QUESTION 1

A technician needs to override DNS and redirect IP addresses and URLs to different locations. Which of the following should the technician do?

- A. Install signal repeaters.
- B. Edit the hosts file.
- C. Configure the firewall.
- D. Enable port forwarding.

Correct Answer: B

QUESTION 2

Which of the following can be used to help recover a lost smartphone?

- A. Remote support software
- B. Locator application
- C. NFC enabled device
- D. GPS navigation software

Correct Answer: B

QUESTION 3

A user enabled a mobile device's screen lock function with pattern unlock. The user is concerned someone could access the mobile device by repeatedly attempting random patterns to unlock the device. Which of the following features BEST addresses the user's concern?

- A. Remote wipe
- B. Anti-malware
- C. Device encryption
- D. Failed login restrictions

Correct Answer: A

The feature that BEST addresses the user's concern is remote wipe. This is because remote wipe allows the user to erase all data on the mobile device if it is lost or stolen, which will prevent unauthorized access to the device

QUESTION 4

The network was breached over the weekend System logs indicate that a single user's account was successfully breached after 500 attempts with a dictionary attack. Which of the following would BEST mitigate this threat?

- A. Encryption at rest
- B. Account lockout
- C. Automatic screen lock
- D. Antivirus

Correct Answer: B

Account lockout would best mitigate the threat of a dictionary attack

QUESTION 5

Which of the following best describes when to use the YUM command in Linux?

- A. To add functionality
- B. To change folder permissions
- C. To show documentation
- D. To list file contents

Correct Answer: A
