QUESTION 1

A system administrator has a large amount of inactive data on the company's storage devices. The excess amount of data is causing slow access to the active data. The administrator needs to set up automatic relocation of data so that data expires based on age.

How can the administrator set the threshold for automatic relocation of data?

- A. use SmartMove
- B. use SmartTier
- C. use Virtual Data Aging Service (VDAS)
- D. use Intelligent Storage Provisioning (ISP)

Correct Answer: B

QUESTION 2

Which two could appear on a deployment checklist when integrating Symantec Mail Security 8300 in a production environment? (Select two.)

- A. Ensure that the appliance is deployed at the gateway
- B. Ensure that the firewall permits communication to and from Symantec over port 443
- C. Ensure that the Exchange Spam Confidence Level is synchronized with suspect spam score range in the Spam Scanning settings area
- D. Block outbound traffic from flowing through the Symantec Mail Security Scanners

Correct Answer: AB

QUESTION 3

Dynamic Multi-Pathing (DMP) uses the I/O policy for distributing I/O load across multiple paths to a disk array or enclosure.

What is the default I/O policy for all arrays?

- A. minimumq
- B. priority
- C. round-robin
- D. adaptive

Correct Answer: A

QUESTION 4

What is the function of the DNS MX record?

- A. specifies the IP addresses for gateway email servers that process Internet traffic
- B. redirects internal IM traffic to the 8300 Series to enforce IM security
- C. specifies the hostnames that accept SMTP email for a domain and the priority in which the hostnames should be tried
- D. identifies the IP addresses associated with host names

Correct Answer: C

QUESTION 5

Which statement is true about the Message Audit Logs feature on Symantec Mail Security 8300?

- A. it requires a dedicated appliance to query data across all scanners
- B. it is accessible only via the Control Center graphical interface
- C. it is disabled by default
- D. it supports a maximum of one mandatory and two optional query filters

Correct Answer: C
