QUESTION 1

Based on a corporate policy, every 12 months one-third of the organization's computers are replaced with new systems. This results in very large purchase orders being placed all at the same time. Their current replacement processes cause significant productivity losses for the users during the replacement period. What can Deployment Solution do to help reduce their productivity losses?

- A. It can simplify the deployment process by bundling all steps for new system builds into a single automated policy including operating system deployment, software provisioning, and user configuration.
- B. It can allow for automatic creation of new computer records from an imported lists of computer information from the manufacturers, which simplifies the imaging process.
- C. It can simplify the process of computer deployments to departments by coordinating with an Active Directory connector for automated configuration setting tasks.
- D. It can add an interface in the console to simplify and synchronize deployment schedules by allowing department heads to enter personal maintenance plans.

Correct Answer: B

QUESTION 2

Which items must be specified to minimize duplication of data and minimize processing on the Notification Server when manually adding a software resource to the Software Catalog?

- A. Product Name, Software Product, and Language
- B. Product Name, Version, and Manufacturer
- C. Product Name, Version, and Software Product
- D. Product Name, Version, and Language

Correct Answer: B

QUESTION 3

Which two tasks should be included in a job that will capture an image of a computer if the image will be used to image multiple computers? (Select two.)

- A. Prepare for Image capture
- B. Reboot to Automation
- C. Apply System configuration
- D. Create Image
- E. Reboot to PXE

Correct Answer: AD

QUESTION 4

A company has an environment where only some computers have the Symantec Workspace Virtualization (SWV) agent installed. When the system administrator distributes an MSI application through a Managed Delivery policy to all company computers and installs the application into a virtual layer, what will happen to computers without the SWV Agent?

- A. The application installation will fail.
- B. The SWV agent will automatically be installed; then the application will be installed into a virtual layer.
- C. The application will be installed as nonvirtual, but the application will be moved into a virtual layer after the SWV agent is installed.
- D. The application will be installed as nonvirtual.

Correct Answer: D

QUESTION 5

A help desk technician is contacted by a user who states that a critical application is working differently than expected. After remotely diagnosing the problem, a system administrator discovers that a key file is missing from the application directory. Which tool within Altiris Client Management Suite 7.1 / 7.x allows the administrator to resolve this issue without requiring a redeployment of the application or system?

- A. Software Management Solution
- B. Real-Time System Manager
- C. pcAnywhere
- D. Application Management

Correct Answer: C
