**QUESTION 1**

Which limitations are placed on software information collected using a Standalone Inventory task on an unmanaged 64-bit computer?

A. Because the Standalone package lacks native 64-bit support, only 32-bit programs are reported.

B. References to the Software Catalog are missing for the unmanaged computer.

C. Any patches staged in Patch Management are removed from the inventory results for the computer.

D. License information is limited to Microsoft products only.

Correct Answer: B

**QUESTION 2**

The Delta Hardware Inventory policy is configured to run daily at 18:00. The Delta Software Inventory policy is configured to run weekly on Mondays at 18:00. Both policies are enabled for all managed computers. What will happen on Mondays at 18:00?

A. Both policies will run simultaneously, only reporting their uniquely different information.

B. Both policies will run simultaneously, reporting all their overlapping information.

C. The weekly task will run on Monday and the daily task will be postponed until its next scheduled run on Tuesday.

D. One policy will run and the second policy will start once the first completes.

Correct Answer: D
