**QUESTION 1**

Refer to the exhibit.

The screenshot shows a browser security warning. At the top left is a red shield icon with a white 'X'. To its right, the text reads: "There is a problem with this website's security certificate." Below this, a horizontal line separates the title from the main message: "The security certificate presented by this website was not issued by a trusted certificate authority." This is followed by a paragraph: "Security certificate problems may indicate an attempt to fool you or intercept any data you send to the server." Below that, a bold recommendation states: "We recommend that you close this webpage and do not continue to this website." At the bottom, there are three options: a green checkmark icon with the text "Click here to close this webpage.", a red 'X' icon with the text "Continue to this website (not recommended).", and a blue circular arrow icon with the text "More information".

An administrator repeatedly encounters this error message while attempting to connect to vCenter Server.

What should the administrator do to address this error message? (Choose the best answer.)

- A. Use a different browser.
- B. Trust the VMware certificate authority (CA) root certificate.
- C. Restart the vCenter Server Appliance.
- D. Reissue a new, unexpired certificate.

Correct Answer: D

**QUESTION 2**

An administrator wants to ensure that when virtual machines (VMs) are powered on, Distributed Resource Scheduler (DRS) places them on the best-suited host. When the cluster becomes imbalanced, the administrator wants DRS to display recommendations for manual VM migration.

Which DRS automation level should the administrator select? (Choose the best answer.)

- A. Manual
- B. Partially automated
- C. Fully automated
- D. Disabled

Correct Answer: B

---

**QUESTION 3**

How many vSphere Trust Authority Clusters can a Trusted Cluster reference? (Choose the best answer.)

- A. 1
- B. 4
- C. 8
- D. 2

Correct Answer: A
