QUESTION 1

Which two Windows Server Operating Systems are supported by VMware Horizon 8? (Choose two.)

- A. Windows Server 2019
- B. Windows Server 2008 R2
- C. Windows Server 2012
- D. Windows Server 2003 R2
- E. Windows Server 2016

Correct Answer: AE

QUESTION 2

An administrator wants to ensure users can access an application that uses .NET 3.0 for desktops available on Horizon On-premises and on Horizon Cloud Service on Microsoft Azure. Which two options would achieve this requirement? (Choose two.)

- A. Create a ThinApp package and provision it with App Volumes.
- B. Install the application on the primary image.
- C. Copy the vmdk and .json file to the Azure storage.
- D. Capture the application in App Volumes.
- E. Copy the vhd and .json file to the Azure storage.

Correct Answer: DE

Reference: <https://docs.microsoft.com/en-us/azure/azure-vmware/azure-vmware-solution-horizon>

QUESTION 3

An administrator needs to deploy an application to specific users in their instant-clone desktop environment with the following characteristics:

The application needs to be updated very frequently.

The application needs to be installed as soon as possible.

The application is not multi-user aware.

Which solution would meet the requirements?

- A. VMware Horizon Published Application
- B. VMware Thinapp
- C. VMware App Volumes
- D. VMware Dynamic Environment Manager

Correct Answer: C

This is easiest to do in an App Volumes environment as you can update the package and then set the new package as current. Since it needs to be deployed to instant-clone desktop users, a Published Application is not suited.

QUESTION 4

An administrator needs to change the message a user receives when using an old Horizon client. Where can this be accomplished?

- A. Settings > Global Settings > Client Restriction Settings
- B. Client settings in VMware Dynamic Environment Manager
- C. Client Restrictions under Desktop Pool settings
- D. Settings > Global Policies > Client Restriction Settings

Correct Answer: A

In Horizon Console, you can configure global client restriction settings by navigating to Settings > Global Settings > Client Restriction Settings and entering the version for Horizon Clients. <https://docs.vmware.com/en/VMware-Horizon-7/7.13/horizon-console-administration/GUID-4842881A-1D1B-432F-8CA2-37FA9A1E2EB9.html>

QUESTION 5

A user reports that sometimes they have issues using their remote desktops and published applications. What three pieces of information should be collected to troubleshoot the issue? (Choose three.)

- A. What exactly did the user see on the screen when the issue occurred?
- B. Has the user reformatted recently to clean up old cached data?
- C. Does the user's home PC have the same problem?
- D. What time was it when the problem occurred?
- E. What was the user doing when the issue happened?

Correct Answer: ADE
