### QUESTION 1

To reduce the risk of users downloading malware to the corporate network, an administrator wants to allow end users to open only intranet websites inside their virtual desktop. Additionally, the administrator wants to configure all other URLs to automatically open in a browser on the end-user's client machine.

Which steps should the administrator take to meet the requirements? (Choose two.)

- A. Enable the URL Content Redirection feature on the desktop pool settings.
- B. Enable the URL Content Redirection feature in Horizon Agent.
- C. Configure group policy settings to indicate how Horizon Agent redirects the URL.
- D. Enable secure website settings in the Global Settings Security menu.
- E. Disable the Allow External Website feature in Horizon Agent.

Correct Answer: BC
