- ⚙️ **365 Days** Free Update
- ⚙️ **800,000+** Satisfied Customers

### QUESTION 1

Which two tasks does the Pluggable Storage Architecture (PSA) perform? (Choose two.)

- A. Handles I/O queueing to the logical devices.
- B. Handles physical path discovery, but is not involved in the removal.
- C. Handles physical path discovery and removal.
- D. Handles I/O queueing to FC storage HBAs.

Correct Answer: AC

When coordinating the VMware NMP and any installed third-party MPPs, the PSA performs the following tasks:

Loads and unloads multipathing plug-ins.

Hides virtual machine specifics from a particular plug-in. Routes I/O requests for a specific logical device to the MPP managing that device.

Handles I/O queueing to the logical devices.

Implements logical device bandwidth sharing between virtual machines. Handles I/O queueing to the physical storage HBAs.

Handles physical path discovery and removal.

Provides logical device and physical path I/O statistics.

### QUESTION 2

An administrator has configured three vCenter Servers and vRealize Orchestrator within a Platform Services Controller domain, and needs to grant a user privileges that span all environments. Which statement best describes how the administrator would accomplish this?

- A. Assign a Global Permission to the user.
- B. Assign a vCenter Permission to the user.
- C. Assign vsphere.local membership to the user.
- D. Assign an ESXi Permission to the user.

Correct Answer: A

Global permissions are applied to a global root object that spans solutions, for example, both vCenter Server and vCenter Orchestrator. Use global permissions to give a user or group privileges for all objects in all object hierarchies.

### QUESTION 3

Which two options are available in the Virtual Machine Component Protection (VMCP) setting Response for Datastore with All Paths Down (APD)? (Choose two.)

- A. Issue Events
- B. Power off and restart virtual machines
- C. Reset virtual machines
- D. Leave Powered On

Correct Answer: AB

### QUESTION 4

An administrator needs to recover disk space on a previously-used thin provisioned virtual disk. The volumes where the administrator needs to recover the disk blocks are on VAAI- compliant storage arrays. Which two actions should the administrator take accomplish this task? (Choose two.)

- A. Perform a Storage vMotion to another volume in order to force free space recovery to occur. This recreates the volume in a new location and recovers all unused space.
- B. Use VMware Converter to migrate the virtual machine to a new datastore. This will recreate the volumes and recover all unused space.
- C. Issue the vmkfstools -vmfs unmap command within the VMFS volume directory on the ESXi host console.
- D. Execute the esxcli storage vmfs unmap command.

Correct Answer: BD

### QUESTION 5

An administrator is upgrading a vCenter Server Appliance and wants to ensure that all the prerequisites are met. What action must be taken before upgrading the vCenter Server Appliance?

- A. Install the Client Integration Plug-in.
- B. Install the database client.
- C. Install the ODBC connector.

D. Install the Update Manager Plug-in.

Correct Answer: A

You must install the Client Integration Plug-in before you deploy or upgrade the vCenter Server Appliance.
