QUESTION 1

Refer to the Exhibit.

Edit Fabric Group

Modify the fabric group.

		Name	Endpoint	Platform Type
<input checked="" type="checkbox"/>		Edge	vcenter02	vSphere (vCenter)
<input checked="" type="checkbox"/>		Payload01	vcenter02	vSphere (vCenter)

An IaaS administrator is unable to remove the Payload01 cluster from the Fabric Group shown in the exhibit.

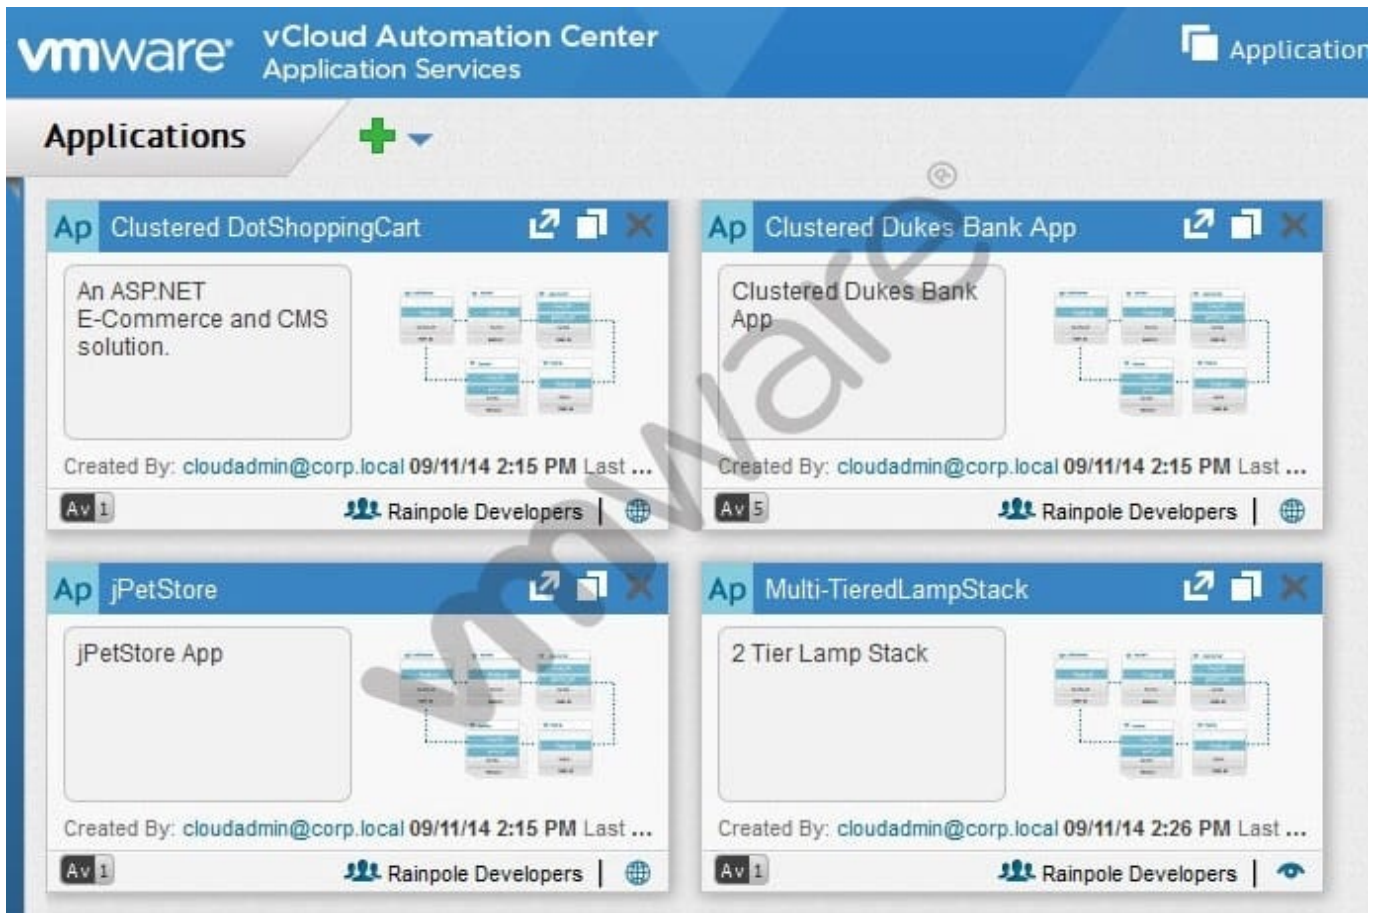

Based on the exhibit, what could be the cause of the problem?

- A. The cluster is assigned to one or more Reservations.
- B. The cluster is assigned to one or more Reservation Policies.
- C. The administrator doesn't have the required permissions to remove clusters from the Fabric Group.
- D. To remove a cluster from a Fabric Group the hosts must be in maintenance mode.

Correct Answer: A

QUESTION 2

Refer to the Exhibit.

A manager in the administration group cannot access a new application blueprint named Multi-TieredLampStack. Access should be restricted to applications used by the administration group.

An administrator examines the information shown in the exhibit.

What should be done to grant access?

- A. Publish the application blueprint.
- B. Add a new application version and grant permissions to the administration group.
- C. In the application, set Sharing to Shared.
- D. Add the administrator to the Rainpole Developers group.

Correct Answer: C

QUESTION 3

The vRealize Automation administrator has created a service named Development, which includes catalog items based on Windows and Linux.

The administrator has created an entitlement named Linux Users and added the Power On and Reset Actions permissions and the Development service.

The Linux users report seeing both Linux and Windows catalog items.

What is required to ensure the Linux users only see Linux catalog items?

- A. Create separate Windows and Linux services. Reassign the Linux Catalog items to the Linux service and the Windows catalog items to the Windows service then add both services to the Linux users\' entitlement.
- B. Create a separate Linux development service. Reassign the Linux catalog items to this service and add this service to the Linux users\' entitlement.
- C. Edit the Linux users\' entitlement. Click the Items and Approvals Tab, add the Linux Catalog items to the Entitled Catalog Items and click Update.
- D. Edit the Linux users\' entitlement. Click the Items and Approvals Tab, add the Linux and Windows catalog items to the Entitled Catalog Items and click Update.

Correct Answer: C

QUESTION 4

A user is creating a blueprint and finds that they are only able to create and edit global blueprints. Why is the user unable to create both global and local blueprints?

- A. The user requires the Provisioning Group Manager role.
- B. The user requires both the Provisioning Group Manager role and the System Administrator role.
- C. The user requires both the Provisioning Group Manager role and the Enterprise Administrator role.
- D. The user requires the Enterprise Administrator role.

Correct Answer: A

QUESTION 5

An IP address is provisioned from a vRealize Automation Network Profile static IP range. What will happen when the workload using the IP address is destroyed?

- A. It will be automatically returned to the range for reuse within minutes.
- B. It will be batched with all reclaimable addresses and returned to the range daily.
- C. It will be permanently marked as unavailable for that specific range to prevent IP conflicts.
- D. It will be marked as unavailable until the range is deleted and recreated.

Correct Answer: A
