QUESTION 1

Which of the following ports are open by default on a Samba 4 Active Directory Domain Controller? (Choose three.)

- A. 443/TCP
- B. 138/TCP
- C. 389/TCP
- D. 445/TCP
- E. 53/TCP

Correct Answer: BCD

QUESTION 2

Which of the following statements are true regarding the smbpasswd command? (Choose two.)

- A. The -d parameter deletes an account from the Samba database.
- B. The -a parameter adds an account to the Samba database. If the account already exists, this parameter is ignored.
- C. The -x parameter removes an account from the Samba database.
- D. The -e parameter excludes an account from the Samba database.
- E. smbpasswd changes only passwords stored on Samba domain controllers and not on DCs running Windows.

Correct Answer: BC

QUESTION 3

After installing a network with one Samba server and several clients, users are complaining that they receive an Unable to browse the network error when trying to visit a public share. What is the most likely cause of this?

- A. The user entered the wrong username and/or password.
- B. The nmbd process is not running on the Samba server.
- C. The user hasn't mapped the share to a local drive letter yet.
- D. The Samba server is not configured as a Domain Master Browser.

Correct Answer: B

QUESTION 4

When integrating Samba and OpenLDAP, what schema needs to be included in the OpenLDAP slapd.conf?

- A. samba.schema
- B. windows.schema
- C. java.schema
- D. microsoft.schema
- E. nis.schema

Correct Answer: A

QUESTION 5

Which of the following sub-commands are available for samba-tool dns? (Select TWO correct answers)

- A. disable
- B. dump
- C. query
- D. add
- E. reverselookup

Correct Answer: CD
