**QUESTION 1**

Which of the following Cisco Nexus features is best managed with DCNM-LAN?

- A. VSS
- B. Domain parameters
- C. Virtual switches
- D. AAA

Correct Answer: C

QUESTION 2

Which two statements about SAN zoning on Cisco Nexus switches are true? (Choose two.)

- A. Zoning is enforced by examining the destination ID field.
- B. Devices can only belong to one zone.
- C. Only one zone set can be activated at any time.
- D. A zone can only be a member one zone set.
- E. Zoning must be administered from the primary SAN switch in the fabric.
- F. Zone configuration changes are nondisruptive.

Correct Answer: CF

A zone set can be activated or deactivated as a single entity across all switches in the fabric. Only one zone set can be activated at any time. If zoning is not activated, all devices are members of the default zone. If zoning is activated, any device that is not in an active zone (a zone that is part of an active zone set) is a member of the default zone. Zoning can be administered from any switch in the fabric. When you activate a zone (from any switch), all switches in the fabric receive the active zone set. Additionally, full zone sets are distributed to all switches in the fabric, if this feature is enabled in the source switch. http://www.cisco.com/en/US/docs/storage/san_switches/mds9000/sw/san-os/quick/guide/qcg_zones.html

QUESTION 3

```
CISCO # scope org /
CISCO / org* # scope boot-policy cisco_1
CISCO /org/boot-policy # create san
CISCO /org/boot-policy/san* # set order 1
CISCO /org/boot-policy/san* # create san-image primary
CISCO /org/boot-policy/san/san-image* # set vhma vHBA2
CISCO /org/boot-policy/san/san-image* # create path secondary
CISCO /org/boot-policy/san/san-image/path* # set lun 5

NEXUS1(config) # feature lcap
NEXUS1(config) # port-channel load-balance source-dst port
NEXUS1(config) # lacp system-priority 1
NEXUS1(config) # interface e2/3-4
NEXUS1(config-if) # channel-group 1 mode on

NEXUS2(config) # feature lacp
NEXUS2(config) # port-channel load-balance src-dst
NEXUS2(config) # lacp system-priority 32768
NEXUS2(config) # interface e2/3-4
NEXUS2(config-if) # channel-group 1 mode active
```

Refer to the exhibit. Which statement about the configured LACP parameters is true?

- A. Ports 3 and 4 on NEXUS1 run LACP
- B. NEXUS1 load balances traffic by using the source and destination MAC addresses
- C. NEXUS2 uses the default LACP system priority
- D. NEXUS1 uses the default LACP system priority

Correct Answer: C

QUESTION 4

Cisco recommends which HSRP configuration when implementing LISP?

- A. HSRP hello messages must be forwarded across data centers to create an active/active HSRP configuration.
- B. HSRP groups and HSRP VIPs in all data centers in the extended LAN must be the same.
- C. HSRP groups must be configured with unique MAC addresses to allow for dynamic EIDs.
- D. HSPR must be set up as active-standby across data centers.

Correct Answer: A

QUESTION 5

Which information does the show fcns database command display?

- A. nWWN
- B. FCID
- C. port name
- D. interface

Correct Answer: B
