QUESTION 1

About snmp v3 encryption, which option we have to use

- A. priv
- B. auth
- C. encrypted

Correct Answer: A

-Configure snmp group:snmp-server group [groupname {v1 | v2c | v3{auth | noauth | priv}}] [read readview] [write writeview] [notify notifyview] [access access-list] -Configure snmp user: snmp-server user username group-name [remote host [udp-port port]] {v1 | v2c | v3 [encrypted] [auth {md5 | sha} auth-password]} [access [ipv6 nacl] [priv {des | 3des | aes {128 | 192 | 256}} privpassword] {acl-number | acl-name}] encryptet if the password are encrypted ex. insert password not in plain text for auth.

QUESTION 2

When a Cisco ASA CX module is management by Cisco Prime Security Manager in a Multiple Devices Mode, which mode does the firewall use ?

- A. Managed Mode
- B. Unmanaged mode
- C. Single mode
- D. Multi mode

Correct Answer: A

http://www.cisco.com/c/en/us/td/docs/security/asacx/9-1/user/guide/b_User_Guide_for_ASA_CX_and_PRSM_9_1b_User_Guide_for_ASA_CX_and_PRSM_9_1_chapter_0110.html#task_7E648F43AD724DA2983699B12E92A528

Managing CX Devices in Multiple Device Mode

If you manage a CX device in PRSM Multiple Device mode, the device is placed in **managed mode**.

When a CX device is in managed mode, you cannot configure it directly through its web interface in Single Device mode. All configuration and monitoring must be done through PRSM Multiple Device mode. The only exception is that the local CLI is still available, where you can troubleshoot and fix basic configuration settings such as IP addressing, DNS, NTP, and passwords.

Putting a CX Device into Managed Mode

To put an ASA CX into managed mode, you add the ASA that contains the ASA CX SSP to the device inventory.

Upon successful device configuration discovery, the CX device is placed in managed mode.

Tip If the CX believes that it is already being managed by a different PRSM server, discovery will fail, because you cannot manage a single CX device from multiple PRSM servers. If this happens, log into the CX web interface in Single Device mode and click the link to unmanage the device. Then try again to add the device to the inventory (delete it first if necessary).

QUESTION 3

Which three commands can be used to harden a switch? (Choose three.)

- A. switch(config-if)# spanning-tree bpdupfilter enable
- B. switch(config)# ip dhcp snooping
- C. switch(config)# errdisable recovery interval 900
- D. switch(config-if)# spanning-tree guard root
- E. switch(config-if)# spanning-tree bpduguard disable
- F. switch(config-if)# no cdp enable

Correct Answer: BDF

QUESTION 4

When a traffic storm threshold occurs on a port, into which state can traffic storm control put the port?

- A. Disabled
- B. Err-disabled
- C. Disconnected
- D. Blocked
- E. Connected

Correct Answer: B

QUESTION 5

Private VLANs have been configured in the data center. Which type of Private VLAN port would allow a new server to communicate with all other interfaces?

- A. shared
- B. private
- C. isolated
- D. promiscuous
- E. community

Correct Answer: D
