-  **800,000+** Satisfied Customers

### QUESTION 1

With which option is the Application Stack-as-a-Service feature available while using Stack Designer to design an application stack?

- A. virtual appliance
- B. design mode
- C. keystone
- D. manual appliance

Correct Answer: A

Explanation: The Application Stack as a Service feature is available with Virtual Appliance only.

### QUESTION 2

A cloud administrator is designing security policies for the control plane of a private Cloud. Which two statements about control plane Cloud Security are true? (Choose two.)

- A. The dynamic control plane is not required to have visibility to all traffic between the user and the applications.
- B. The dynamic control plane does not require visibility into the data plane and all components that operate within the data plane.
- C. A dynamic control plane must be able to intercept traffic as it traverses the cloud, interpret the data, and instruct the cloud architecture on how to efficiently connect the user to the appropriate application instance.
- D. Dynamic control plane elements are a requirement at every layer of the cloud architecture for cloud environments to be operationally efficient and on demand.

Correct Answer: AD

---

### QUESTION 3

Which three statements about thick provisioning are true? (Choose three.)

- A. Unused space is available for use by other virtual machines.
- B. Disk has all space allocated at creation time.
- C. Before writing to a new block, a zero must be written.
- D. The entire disk space is reserved and is unavailable for use by other virtual machines.

E. The size of the VMDK, at any point in time, is as much as the amount of data written out from the VM.

F. Operates by allocating disk storage space in a flexible manner among multiple users, based on the minimum space required by each user at any given time.

Correct Answer: BCD

Explanation: A thick disk has all space allocated at creation time. This space may contain stale data on the physical media. Before writing to a new block a zero has to be written, increasing the IOPS on new blocks compare to Eager disks. The entire disk space is reserved and unavailable for use by other virtual machines.

#### QUESTION 4

Which two infrastructure security elements are important when designing a secure multi-tenant environment? (Choose two.)

- A. physical firewalls
- B. internal and external separation using 802.1q and virtual port channels
- C. high availability and redundancy
- D. VSG
- E. NGIPS

Correct Answer: BE

---

#### QUESTION 5

Which statement about thin provisioning is true?

- A. The disk is allocated and zeroed on demand as the space is used.
- B. The disk has all space allocated at time of creation.
- C. The disk has all space allocated and is wiped clean of any previous contents on the physical media at creation time.
- D. Before writing to a new block, a zero must be written.

Correct Answer: C
