-  **365 Days** Free Update
-  **800,000+** Satisfied Customers

### QUESTION 1

Drag and drop the protocol on the left to its purpose in ACI fabric discovery on the right.

Select and Place:

LLDP	propagates configuration from APICs to leafs and spines
IS-IS	builds the forwarding table for the overlay
VXLAN	transports fabric information during the discovery process
OpFlex	creates a Layer 2 overlay on a Layer 3 network

Correct Answer:

	IS-IS
	OpFlex
	VXLAN
	LLDP

### QUESTION 2

The network operator asks you to change the config setting on one specific host. All 300 hosts are managed with Puppet. Which action results in the requested change?

- A. This is an unsupported feature of Puppet, and Chef or Ansible must be used to make this change.
- B. Go to that host and make the config change. Puppet sees the local override and skips that part.
- C. Add an if statement to the Puppet manifest, and add specific config settings, in case Puppet is running on that host.
- D. Add a node-based variable lookup override in Hiera, so that if Puppet runs on that host, it takes the variable from Hiera.

Correct Answer: D

Reference: [https://docs.puppet.com/puppet/4.9/hiera\\_use\\_function.html#merge-behaviors](https://docs.puppet.com/puppet/4.9/hiera_use_function.html#merge-behaviors)

### QUESTION 3

Drag and drop the description on the left to the correct product name on the right. Not all options are used.

Select and Place:

manages virtual network overlays	Cisco APIC-EM
has users who create an application profile to track application health over the network	ACI
provides both REST and SOAP interfaces	
provides features such as PnP and moderation of the network via REST northbound API calls	

Correct Answer:

manages virtual network overlays	provides features such as PnP and moderation of the network via REST northbound API calls
	has users who create an application profile to track application health over the network
provides both REST and SOAP interfaces	

### QUESTION 4

What is the best way to specify the location of Python within a script?

- A. #!/usr/bin/env bash
- B. #!/usr/bin/env python
- C. #!/usr/local/bin/python
- D. #!/usr/bin/python
- E. #!/scriptname

Correct Answer: B

If you have several versions of Python installed, `/usr/bin/env` will ensure the interpreter used is the first one on your environment's `$PATH`. The alternative would be to hardcode something like `#!/usr/bin/python`; that's ok, but less flexible.

Reference: <http://stackoverflow.com/questions/2429511/why-do-people-write-usr-bin-env-python-on-the-first-line-of-a-python-script>

### QUESTION 5

Drag and drop the HTTP status code number on the left to the corresponding status code name on the right.

Select and Place:

200	Bad Request
401	Unauthorized
204	OK
400	No Content
404	Not Found

Correct Answer:

	400
	401
	200
	204
	404
