QUESTION 1

```
const xml = `<?xml version= "1.0" encoding= "UTF-8"?>
<serv:message xmlns:xsi= "http://www.w3.org/2001/XMLSchema-instance"
xmlns:serv="http://www.webex.com/schemas/2002/06/service"
xsi:schemaLocation="http://www.webex.com/schemas/2002/06/service"
http://www.webex.com/schemas/2002/06/service/service.xsd">
  <header>
    <securityContext>
      <webExID>admin@cisco.com</webExID>
      <password>password</password>
      <siteName>cisco</siteName>
      <returnAdditionalInfo>>true</returnAdditionalInfo>
    </securityContext>
  </header>
  <body>
    <bodyContent xsi:type= "java:com.webex.service.binding.user.SetUser">
      <webExId>user@cisco.com</webExId>
      <personalMeetingRoom>
        <hostPIN>3421</hostPIN>
      </personalMeetingRoom>
    </bodyContent>
  </body>
</serv:message>;
var xmlhttp = new XMLHttpRequest();

<< missing code >>

xmlhttp.setRequestHeader('Content-Type', 'text/xml');
xmlhttp.send(xml);
```

Refer to the exhibit. A developer must construct an HTTP Request to use the XML API to set a Personal Meeting Room PIN for a given user. Which code completes the code to create the request?

- A. xmlhttp.open("GET", "https://cisco.webex.com/WBXService/XMLService");
- B. xmlhttp.open("PATCH", "https://cisco.webex.com/WBXService/XMLService");
- C. xmlhttp.open("PUT", "https://cisco.webex.com/WBXService/XMLService");
- D. xmlhttp.open("POST", "https://cisco.webex.com/WBXService/XMLService");

Correct Answer: D

The post method can be used for HTTP request that sets up a personal meeting room PIN for a user.

QUESTION 2

Which element is needed to build a Web application that authenticates Webex users and can post messages under the user's identity?

- A. OAuth integration configured with the `messages\_write` scope
- B. bot access token
- C. Guest Issuer application
- D. self-signed certificate that is created from a public authority

Correct Answer: A

Reference: <https://developer.webex.com/blog/real-world-walkthrough-of-building-an-oauth-webex-integration>

### QUESTION 3

```
const request = require('request');
request.post({url: 'https://api.webex.com/WBXService/XMLService',
  headers: {'Content-Type': 'text/xml'},
  body: '<message><header><securityContext>
    <siteName>apidemoeu</siteName>
    <webExID>alice</webExID>
    <sessionTicket>AAABb6DpCJgAABUU2X0FMR09SSVRITV8=</sessionTicket>
  </securityContext></header>
  <body><bodyContent xsi:type= "java:com.webex.service.binding.meeting.CreateMeeting">
    <accessControl>
      <meetingPassword>Cisco1234</meetingPassword>
    </accessControl>
    <metaData><confName>Sample Meeting</confName>
    <meetingType>105</meetingType></metaData>
    <schedule><startDate>1/13/2020 16:00:00</startDate></schedule>
  </bodyContent></body></message>' },
function (error, response, body) {
  if (!error && response.statusCode == 200) {
    console.log('Here!') } });
```

Refer to the exhibit. The Node.js script shown uses the Webex Meetings XML API to print "Here!" to the console. Which statement is a correct observation about the results of the script?

- A. The was not complex enough.
- B. The credential was expired.
- C. The WebexMeetings XML API service processed the request.
- D. The meeting was created successfully.

Correct Answer: C

The password, although not that good, has a capital letter and numbers. Therefore, it is okay. SessionTicket credential is not expired because the error function doesn't check that. We are not sure if the meeting was created successfully however, there is no wrong in the code, therefore, webexmeetings XML API service has processed the request.

**QUESTION 4**

**DRAG DROP**

Drag and drop the definitions from the left onto the correct Webex Teams REST API HTTP response status codes on the right.

Select and Place:

Too many requests have been sent in a given amount of time, and the request has been rate limited. A Retry-After header that specifies how many seconds you need to wait before a successful request can be made should be present.	401
The request to a resource used an unsupported HTTP request method.	403
Authentication credentials were missing or incorrect.	405
The request is understood but has been refused, or access is not allowed.	429

Correct Answer:

Authentication credentials were missing or incorrect.
The request is understood but has been refused, or access is not allowed.
The request to a resource used an unsupported HTTP request method.
Too many requests have been sent in a given amount of time, and the request has been rate limited. A Retry-After header that specifies how many seconds you need to wait before a successful request can be made should be present.

**QUESTION 5**

**DRAG DROP**

Drag and drop the methods from the left into the correct order of execution on the right to use webex-js-sdk in a browser to call and share the screen with another Webex user. Not all methods are used.

Select and Place:

meeting.addMedia()	step 1
meeting.updateShare()	step 2
webex.call()	step 3
call.getMediaStreams()	step 4
webex.meetings.create()	
meeting.getMediaStreams()	

Correct Answer:

	webex.meetings.create()
	meeting.getMediaStreams()
webex.call()	meeting.addMedia()
call.getMediaStreams()	meeting.updateShare()
