QUESTION 1

Which statement expresses the relationship between users, roles, and groups?

- A. Roles grant permissions. Users are not directly assigned roles but inherit them through belonging to groups.
- B. A group is a name for a collection of roles and each role is assigned its own administrator user.
- C. Users can belong to groups for easy management and can be assigned roles which grant them access rights.
- D. Groups and roles directly correspond to sections of the SMGR Web Console navigation pane and, unless a user belongs to a specific role group, they cannot access the corresponding management screens.

Correct Answer: C

QUESTION 2

Digit Conversion in Adaptation can be specified to modify "origination" type headers. Which three are origination / source type URIs? (Choose three.)

- A. Request-URI
- B. P-Asserted-Identity
- C. Refer-To (in REFER messages)
- D. History-info (calling portion)
- E. Contact (in 3xx response)

Correct Answer: BDE

QUESTION 3

Which two functionalities does the SIP firewall provide to protect Session Manager from SIP flood attack? (Choose two.)

- A. Removing the suspected source
- B. Rate Limiting
- C. Blocking the Entity Link
- D. Rate Blocking

Correct Answer: BD

QUESTION 4

What is the outcome of running SMnetsetup on a server that has an existing installation of session manager 601?

- A. The network and date/time is configured on the server.
- B. A System Manager System administrator login will be created.
- C. The same version of the Session Manager software currently Installed is re-installed?
- D. The current version of the Session Manager software is upgraded.

Correct Answer: A

QUESTION 5

How is request routed to a "Named" Application?

- A. Session Manager uses the phase tag of a route header of the incoming request and matches it to a dial pattern then uses the associated Routing Policy.
- B. Session Manager uses the route header of the incoming request and matches it to a dial pattern then uses the associated Routing Policy.
- C. Session Manager uses the Request URI of the incoming request and matches it to a dial pattern then uses the associated Routing Policy.
- D. Session Manager uses the termination application sequence associated to the Communication Profile of the user to route the request.

Correct Answer: C
