QUESTION 1

Which RFC outlines BCP 84?

- A. RFC 3704
- B. RFC 2827
- C. RFC 3030
- D. RFC 2267
- E. RFC 1918

Correct Answer: A

QUESTION 2

Which two statements about the IPv6 OSPFv3 authentication Trailer are true (choose two)

- A. The AT-bit resides in the OSPFv3 Header field
- B. The IPv6 Payload length includes the length of the authentication Trailer
- C. It Provide an alternative option to OSPFv3 IPsec authentication
- D. The AT-bit must be set only in OSPFv3 Hello packets that include an Authentication Trailer
- E. The AT-bit must be set only in OSPFv3 Database Description packets that include an Authentication Trailer
- F. The OSPFv3 packet length includes the length of the Authentication Trailer

Correct Answer: DE

QUESTION 3

What technique can an attacker use to obfuscate a malware application payload, allowing it to bypass standard security mechanisms?

- A. BASE64
- B. steganography
- C. a PE32 header
- D. decryption
- E. Teredo tunneling

Correct Answer: B

Explanation: Base64 is a group of similar binary-to-text encoding schemes that represent binary data in an ASCII string format by translating it into a radix-64 representation. The term Base64 originates from a specific MIME content transfer encoding.

Steganography is the practice of concealing a file, message, image, or video within another file, message, image, or video. The word steganography combines the Greek words steganos (), meaning "covered, concealed, or protected", and graphein () meaning "writing". In computer networking, Teredo is a transition technology that gives full IPv6 connectivity for IPv6-capable hosts that are on the IPv4 Internet but have no native connection to an IPv6 network. Unlike similar protocols, it can perform its function even from behind network address translation (NAT) devices such as home routers.

QUESTION 4

Which series of steps illustrates the correct flow for incident management?

- A. Identify, log, categorize, prioritize, initial diagnosis, escalate, investigate and diagnose, resolve and recover, close
- B. Categorize, log, identify, prioritize, initial diagnosis, escalate, investigate and diagnose, resolve and recover, close
- C. Identify, log, categorize, prioritize, initial diagnosis, investigate and diagnose, escalate, resolve and recover, close
- D. Identify, categorize, prioritize, log, initial diagnosis, escalate, investigate and diagnose, resolve and recover, close

Correct Answer: A

QUESTION 5

Which two options best describe the authorization process as it relates to network access? (Choose two.)

- A. the process of identifying the validity of a certificate, and validating specific fields in the certificate against an identity store
- B. the process of providing network access to the end user
- C. applying enforcement controls, such as downloadable ACLs and VLAN assignment, to the network access session of a user
- D. the process of validating the provided credentials

Correct Answer: BC
