QUESTION 1

Where is Ethernet bridged traffic terminated in a mesh network?

A. WLC

B. WGB

C. MAP

D. RAP

Correct Answer: D

QUESTION 2

The IEEE 802.11i standard defines mechanisms for wireless client authentication and data encryption. During 802.1X EAP authentication, a number of keys are used in order to establish a secure encrypted link between the access point and the client. Which two of these keys are derived via the WPA four-way handshake? (Choose two.)

A. PMK

B. PTK

C. MSK

D. GMK

E. GTK

Correct Answer: BE

QUESTION 3

You are going to create a new WLAN on your production 5508 WLC running 7.0.116.0 code. You do not want this WLAN to be in the default AP group on the Cisco WLC until you have thoroughly tested it. How can you achieve this goal when creating the WLAN on the production controller?

A. Create the new WLAN on the Cisco WLC by using WLAN ID 13.

B. A new WLAN will always be in the default AP group until you move the WLAN to a different AP group on the Cisco WLC.

C. Use a Cisco WCS to create the WLAN by using WLAN ID 17.

D. Create the new WLAN on the Cisco WLC using WLAN ID 20.

Correct Answer: D

QUESTION 4

The IT manager wants the Cisco WCS to send email notifications of alarms to identify issues in a timely fashion. The manager finds that not all of the alarms were sent via email. Which default severity level of alarm will trigger an email?

A. major

B. critical

C. minor

D. informational

E. critical and major

Correct Answer: B

QUESTION 5

Refer to the exhibit.

Which statement is true when the basic audit mode is selected in Cisco WCS?

A. Basic audit will only audit the reachability and functional status of the WLAN controller.

B. Basic audit will compare the device configuration in the WCS database against the current WLAN controller configuration.

C. Basic audit will compare the WCS template settings against the current WLAN controller configuration.

D. Basic audit will instruct the WLAN controller to notify WCS when a configuration change has occurred via the web interface or CLI of the controller.

Correct Answer: B
