QUESTION 1

Which three predictors are supported on ACE to select the best server to fulfill a client request? (Choose three.)

A. Hash Address, which selects the server by using a hash value that is based on the source IP address, the destination IP address, or both

B. Hash URL, which selects the server by using a hash value that is based on the requested URL

C. Hash MAC, which selects the server by using a hash value that is based on the source MAC address, the destination MAC address, or both

D. Hash Header, which selects the server by using a hash value that is based on the HTTP header name

E. Highest bandwidth, selects the server that processed the highest amount of network traffic based on the average bandwidth that the server used over a specified number of samples

F. First Come First Server, always selects the first server in the list of real servers.

Correct Answer: ABD

QUESTION 2

Refer to the exhibit.

```
N5K-1# show zone status vsan 1          N5K-2# show zone status vsan 1
VSAN: 1 default-zone: permit distribute:  VSAN: 1 default-zone: deny distribute:
active only Interop: default            active only Interop: default
    mode: basic merge-control: allow        mode: basic merge-control: allow
    session: none                           session: none
    hard-zoning: enabled broadcast:         hard-zoning: enabled broadcast:
disabled                                disabled
Default zone:                           Default zone:
    qos: none broadcast: disabled ronly:    qos: none broadcast: disabled ronly:
unsupported                             unsupported
Full Zoning Database :                  Full Zoning Database :
    DB size: 4 bytes                        DB size: 4 bytes
    Zonesets:0  Zones:0 Aliases: 0          Zonesets:0  Zones:0 Aliases: 0
Active Zoning Database :                Active Zoning Database :
    Database Not Available                  Database Not Available
Status:                                 Status:
```

Given the displays from N5K-1 and N5K-2, what is the expected result if the zone mode enhanced vsan 1 command is issued on N5K-1?

A. The mode change will complete with a warning that the zone database from N5K-1 will be distributed throughout the

fabric.

B. The mode change will not complete due to the mismatch in the default zone mode.

C. The mode change prompts the administrator to override the default zone mismatch and make them the same.

D. The mode change completes, and the default zone setting remains unchanged in N5K-1 and N5K-2.

E. The default zone setting is set to deny in both switches because it is more secure.

Correct Answer: A

QUESTION 3

Refer to the exhibit.

```
Command:
VSM# show svs connections
connection VC:
    ip address: 10.10.10.30
    remote port: 80
    protocol: vmware-vim https
    certificate: default
    datacenter name: DC1
    DVS uuid: 67 32 30 50 a6 d2 49 64-9e 1c 5f 49 e3 af 55 99
    config status: Disabled
    operational status: Disconnected
    sync status: -
    version: -

ERROR:
VSM-PRI-188# conf
VSM-PRI-188(config)# svs connection VC
VSM-PRI-188(config-svs-conn)# connect
ERROR: [VMWARE-VIM] Extension key was not registered before its use
```

The network administrator is adding a new Cisco Nexus 1000V Switch to vCenter, but does not see the new switch under the vCenter networking tab. The administrator issues the command that is shown in the exhibit on VSM to troubleshoot this problem. When the administrator attempts to fix the issue, the error that is shown in the exhibit is seen. Which option describes the most correct cause of this error?

A. There is a missing control VLAN in the VSM configuration.

B. There is a missing packet VLAN in the VSM configuration.

C. VSM has no network connection to vCenter.

D. The VSM extension key is not installed on vCenter.

E. The vCenter extension key is not installed on VSM.

Correct Answer: D

QUESTION 4

When an NP port becomes operational, the NP switch first logs itself into the core switch by sending a FLOGI request (using the port WWN of the NP port). What will occur next?

A. The switch registers with the fabric name server.

B. The switch will perform a PLOGI to the port login server.

C. The switch will register parameters using FDISC.

D. The NPV switch will perform a PLOGI using FDISC to register with the fabric name server.

Correct Answer: A

QUESTION 5

Which three statements about Cisco Device Manager Device View are true? (Choose three.)

A. It can be used to configure zones for multiple VSANs

B. Can be used to configure FC timer values on multiple switches simultaneously.

C. it can be used to configure virtual Fibre Channel interfaces.

D. it cannot be used to manage CLI security access to the switch.

E. It cannot be used to configure Fibre Channel over Ethernet features.

F. It can be used to manage ports, port channels, and trunking.

Correct Answer: ACF
