QUESTION 1

A customer is deploying a small Horizon View environment. It wants to minimize the number of connection servers required for the architecture while minimizing single points of failure and simplifying the user experience.

Which remote access method would accomplish this?

- A. Security Servers
- B. NSX load balancing
- C. VPN Tunnel
- D. Unified Access Gateway

Correct Answer: D

QUESTION 2

An application packaging team is preparing to deploy a new enterprise application for 1000 users. Application requirements and limitations include:

1.
Windows 2012 R2 or Windows 10 64-bit OS
2.
Installation of a PDF printer
3.
Application only allows a single instance to be launched
4.
1 GB RAM

The organization is only using Horizon hosted applications on Windows 2012 R2. The servers are at 30% utilization. No additional users will be added.

What changes to the Horizon environment will be required to deploy the application?

- A. Deploy a Windows 10 desktop pool.
- B. Deploy User Environment Manager.
- C. Deploy a new application pool using Windows 2012 R2.
- D. Deploy App Volumes with writeable volumes.

Correct Answer: B

QUESTION 3

The IT team for a company wants to deploy VMware Horizon and allow end users to access their Horizon Windows desktops using Windows laptops, Android and iOS mobile phones, and Android and iOS tablets with the following requirements:

1.
High data security
2.
Low client bandwidth
3.
Low client processor overhead
4.
Low storage space
5.
High image quality

Which Horizon desktop pool meets these requirements?

- A. Instant Clones Refresh OS disk after logoff: enabled Default display protocol: PCoIP Allow users to choose protocol: disabled Adobe Flash throttling: conservative
- B. Linked Clones Refresh OS disk after logoff: enabled Default display protocol: Blast Extreme Allow users to choose protocol: disabled Adobe Flash throttling: conservative
- C. Linked Clones Refresh OS disk after logoff: enabled Default display protocol: RDP Allow users to choose protocol: disabled Adobe Flash throttling: aggressive
- D. Instant Clones Refresh OS disk after logoff: enabled Default display protocol: RDP Allow users to choose protocol: disabled

Correct Answer: A

QUESTION 4

The VMware Horizon end users of an organization use applications provided through VMware App Volumes. The organization's security policy requires that only users in specific Active Directory groups, and on the headquarters LAN, access some of the applications in one App Volumes Appstack.

Which VMware technology accomplishes this requirement?

- A. App Volumes AppToggle
- B. VMware NSX

C. vRealize Operations for Published Applications

D. User Environment Manager

Correct Answer: B
