QUESTION 1

What is the VMware recommended best practice to scale vCloud Director cells?

- A. Deploy N+1 cells where N is number of resource groups or $n/3000 + 1$ powered on virtual machines.
- B. Deploy one vCloud Director Cell per 3000 simultaneous client connections.
- C. Deploy one additional vCloud Director Cell per N where $N = \text{Virtual Machines} / \text{Resource Pools} * \text{Number of vCenters}$.
- D. Deploy a one to one ratio of vCloud Director Cells per vCenter cluster.

Correct Answer: A

QUESTION 2

Which authentication mode should be used when utilizing a Microsoft SQL Server database for vCloud Director?

- A. certificate-based authentication
- B. mixed-mode authentication
- C. Windows authentication
- D. Active Directory authentication

Correct Answer: B

Reference: <https://docs.vmware.com/en/vCloud-Director/9.1/com.vmware.vcloud.install.doc/GUIDC3C2E2DA-D760-413A-AA8A-A4BC674C068F.html>

QUESTION 3

What are three new capabilities of VMware vCloud Availability for Cloud-to-Cloud 1.5? (Choose three.)

- A. VMware vRealize Automation Support
- B. VMware vRealize Orchestrator Integration
- C. VMware Site Recovery Manager Integration
- D. VMware NSX SD-WAN by VeloCloud Integration
- E. vCloud Availability for Cloud to Cloud API
- F. VMware vRealize Operations Day 2 Monitoring Pack

Correct Answer: BEF

QUESTION 4

An administrator is planning a new VMware vCloud Director deployment and is concerned about secure communications between the clients and servers.

Which step ensures secure communications between the clients and servers?

- A. Create a single certificate for each member of the server group and import the certificates into the host keystores.
- B. VMware vCloud Director automatically creates self-signed certificates.
- C. Create two certificates for the server group and import the certificates into each cell keystore.
- D. Create a single certificate and share it with all the members of the server group.

Correct Answer: C

vCloud Director uses SSL to secure communications between clients and servers. Before you install and configure a vCloud Director server group, you must create two certificates for each member of the group and import the certificates into host keystores

QUESTION 5

Which organization virtual data center network type is used for internal communication?

- A. routed
- B. isolated
- C. protected
- D. direct

Correct Answer: B
