QUESTION 1

An administrator is planning a new VMware vCloud Director deployment and is concerned about secure

communications between the clients and servers.

Which step ensures secure communications between the clients and servers?

A. Create a single certificate for each member of the server group and import the certificates into the host keystores.

B. VMware vCloud Director automatically creates self-signed certificates.

C. Create two certificates for the server group and import the certificates into each cell keystore.

D. Create a single certificate and share it with all the members of the server group.

Correct Answer: C

vCloud Director uses SSL to secure communications between clients and servers. Before you install and configure a vCloud Director server group, you must create two certificates for each member of the group and import the certificates into host keystores

QUESTION 2

Which vSphere capability assigns storage to VMware vCloud Director?

A. storage profiles

B. datastores

C. network file system

D. Fibre Channel SAN

Correct Answer: A

Reference: https://blogs.vmware.com/vsphere/2013/02/using-storage-profiles-with-vcloud-director-2.html
