QUESTION 1

Which option is the page response for a PS paging request in 2G access?

A. service request with type "data"

B. service request with type "page response"

C. any uplink LLC PDU from MS/BSC

D. any uplink BSSGP PDU from MS/BSC

E. service request with type "signaling"

Correct Answer: C

QUESTION 2

Which option describes the ICAP protocol?

A. ICAP is a protocol designed to enable inter-device communications for different vendor systems to share information about subscribers in a common format. ICAP allows for subscriber session control for actions such as session disconnect and suspension.

B. ICAP is a protocol designed to enable subscribers to communicate in a peer-to-peer network for file sharing purposes and is often used to circumvent upstream content filtering.

C. ICAP is a communication access package consisting of a mixed platform of services such as web, FTP, and authentication. ICAP is used to minimize the deployment footprint and expedite new offerings for Internet service providers.

D. ICAP is a protocol designed to support dynamic content filtering, insertion, and modification of web pages. ICAP allows interaction with external content servers such as parental control (content filtering) servers to provide content filtering service support.

Correct Answer: D

QUESTION 3

Which organization developed and maintains the Universal Mobile Telecommunications System?

A. 3GPP2

B. 3GPP

C. ITU

D. ANSI

Correct Answer: B

QUESTION 4
