**QUESTION 1**

Which two commands are needed to view load averages of a server to sample normal operation? (Choose two.)

- A. vmstat
- B. top
- C. ps
- D. uptime
- E. dstat
- F. iostat

Correct Answer: BD

QUESTION 2

Refer to the exhibit

```
Failed to connect to network element: errcode = 7, errmsg =  
connection to network element failed: Maximum session limit reached  
Error connecting to network element  
Destroy Element List failure: 5, bad argument in onep api: Null collection  
argument
```

You try to connect to a network element using a Cisco onePK application. You get this error while running the application. Which option describes the issue?

- A. There is no reachability to the network element through pings (ICMP). Routing must be checked.
- B. An ACL is configured on router that does not allow the onePK application to establish a connection.
- C. A "session max" is configured on the router, and the number of sessions to the router has been exceeded.
- D. There is an error in the onePK application code, and an incorrect argument was passed in one of the APIs.
- E. A firewall rule is blocking the onePK TCP connection to the router.

Correct Answer: C

QUESTION 3

Your application encounters an error when writing data on a file. To troubleshoot, you enter the df

Correct Answer: A

QUESTION 4

Which two methods increase the overall network bandwidth for a web host? (Choose two.)

- A. Replace bandwidth with priority in CBWFQ configuration.
- B. Install additional vswitches on the host.
- C. Add additional NICs to the host LACP.
- D. Use policy-based routing on the source port of packets destined to the web server to traverse a higher bandwidth link.
- E. Mark DSCP to an established HTTP queue with higher allocations.
- F. Use a low latency SLB.
- G. Add vCPUs to the virtual machine.

Correct Answer: CE

QUESTION 5

Which option describes the goal of acceptance testing?

- A. testing that a single function or procedure in the code is implemented correctly
- B. testing that a specific bug discovered in the past does not reoccur
- C. testing that the feature implemented is correct and complete according to the requirements and design document
- D. testing that the system under test still starts and performs very basic operations

Correct Answer: C
