QUESTION 1

Which type of delay describes the amount of time it takes to place a frame onto a physical medium?

- A. propagation delay
- B. processing delay
- C. serialization delay
- D. queuing delay

Correct Answer: C

QUESTION 2

Refer to the exhibit. Which type of ephone-dn is configured for the two ephones that are shown?

```
ephone 1
 mac-address 0023.5322.98BA
 button 101,10,11,12
!
ephone 2
 mac-address 0023.5332.985C
 button 102,10,11,12
```

- A. single-line-octo
- B. hunt line
- C. shared-line, nonexclusive
- D. two directory numbers with one telephone number
- E. shared-line, overlay
- F. octo-line

Correct Answer: E

Explanation: The above exhibit shows the configuration for a simple shared-line overlay set. The primary ephone-dn that is configured for each phone is unique while the remaining ephone-dns 10, 11, and 12 are shared in the overlay set on both phones. The primary ephone-dn in a shared-line overlay set is configured unique to the phone to guarantee that the phone has a line available for outgoing calls, and to ensure that the phone user can obtain dial-tone even when there are no idle lines available in the rest of the shared-line overlay set. Using a unique ephone-dn also provides a unique calling party identity on outbound calls made by the phone so that the called user can see which specific phone is calling. http://www.cisco.com/en/US/docs/voice_ip_comm/cucme/admin/configuration/guide/cmecover.html#wp1099687

QUESTION 3

What is the purpose of a COR list?

- A. to identify the incoming call leg with the highest priority
- B. to create a set of dial peers for IP phones
- C. to restrict the ability of phones to make certain types of calls
- D. to list a detailed configuration for an IP phone and voice port

Correct Answer: C

QUESTION 4

When configuring a voice gateway to provide DHCP to devices, which command is required for the first 10 IP addresses in the subnet 192.168.10.0/24 to be reserved for servers and gateways?

- A. ip excluded-address 192.168.10.1 192.168.1.10
- B. ip dhcp excluded-address 192.168.10.11 192.168.10.254
- C. ip dhcp excluded-address 192.168.10.0/24 192.168.10.10/24
- D. ip dhcp excluded-address 192.168.10.1 192.168.10.10
- E. ip dhcp excluded-address 192.168.10.11/24 192.168.10.254/24
- F. ip excluded-address 192.168.10.10 192.168.10.254

Correct Answer: D

QUESTION 5

Which proprietary voice client-server protocol sends traffic back to Cisco Unified Communications Manager with every digit pressed on the endpoint?

- A. H.323 Protocol
- B. Media Gateway Control Protocol
- C. Session Initiation Protocol
- D. Skinny Client Control Protocol

Correct Answer: D
