**QUESTION 1**

An engineer is studying the TSM for a VoWLAN user experiencing issues using a CCXv3 device. What two items will be shown? (Choose two.)

- A. uplink packet latency
- B. uplink packet loss
- C. downlink packet latency
- D. downlink packet loss
- E. uplink MOS score
- F. downlink MOS score

Correct Answer: CD

QUESTION 2

Which three call information items does AirMagnet VoFi Analyzer provide? (Choose three.)

- A. the codec used by the calling phone
- B. approximate length of the call in minutes
- C. MOS values throughout the duration of the call
- D. 802.11e access category overruns
- E. co-channel interference percentage during the call

Correct Answer: ABC

QUESTION 3

A customer using a 7925 phone reports that sometimes the music on hold does not come through or is choppy. The engineer checks the location history and notices it tends to occur toward the edge of the cell. The APs have their data rates set to 12Mbps as mandatory where all rates below are disabled. What is the cause of this issue?

- A. beacons have been disabled
- B. mandatory data rates set too high
- C. the phone requires the 11Mbps rate
- D. unicast is enabled

Correct Answer: B

**QUESTION 4**

VoIP clients can be impacted by jitter. Which of these statements best describes jitter?

- A. Jitter occurs because the receiver buffer is smaller than the sender buffer, thus packets are dropped and voice quality becomes worse.
- B. Jitter is defined as variation in the delay of received packets.
- C. Jitter can be reduced by designing cells that use only the 802.11a frequency band.
- D. A best practice to avoid jitter is to ensure that the end-to-end round-trip time does not exceed 150 ms.

Correct Answer: B

QUESTION 5

A hospital is implementing wireless mobile carts outfitted to provide High-Definition IPTV access for patients. The end-user will need to be able to move around, while maintaining a high definition stream with as few artifacts as possible while viewing. What three technologies need to be utilized to guarantee access at this requirement and how would they be configured? (Choose three.)

- A. set controller to Multicast-to-Multicast mode
- B. configure the video stream under Media Streams with "High" template
- C. set SSID QoS to gold
- D. configure the video stream under Media Streams with "Medium" template
- E. set SSID QoS to platinum
- F. set controller to Multicast-to-Unicast mode

Correct Answer: ABC
