QUESTION 1

You are responsible for migrating client computers from Windows 98 and Windows NT Workstation 4.0 to Windows 2000 Professional. You have installed Windows 2000 Professional and reinstalled the necessary applications on 10 computers. You have returned these computers to their users.The users of these computers report that their word processing application will not start. What should you do?

A. Set the permission on the application to Execute.

B. Add the application to the Run key in the registry.

C. Apply the Securews.inf security template on the users\\' computers.

D. Apply the Compatws.inf security template on the users\\' computers.

Correct Answer: C

QUESTION 2

You are the administrator of a Windows 2000 Professional computer that has a shared printer. Several departments in your company use the shared printer.The sales department frequently prints multiple-page presentation graphics, which take a long time to print. Users in other departments who have short messages to print must wait an unnecessarily long time for their jobs to print.You want to improve the efficiency of printing for all users who use the shared printer. You want to accomplish this with the least amount of administrative effort.What should you do?

A. Configure the priority of the printer to 50. Add a new printer, and set the priority to 1. For the new printer, deny Print permission for users in the sales department.

B. Configure the priority of the printer to 50. Add a new printer, and set the priority to 95. For the new printer, deny Print permission for users in the sales department.

C. Monitor the print queue, and raise the priority of all the print jobs that are sent by users who are not members of the sales department.

D. Delete the old printer. Add a new printer, and set the priority to a higher value. Pause the print queue only when graphic-intensive print jobs are printing.

Correct Answer: A

QUESTION 3

You need to install Windows 2000 Professional on 35 new computers on your company\\'s network. You also need to install Recovery Console during the installation.You create a distribution folder and copy the Windows 2000 Professional Support folder to the network server. Then you create a network boot floppy disk to install Windows 2000 Professional from the distribution folder.You need to create a batch file, which the network boot disk will execute to start the installation. Which command must you specify in the batch file?

A. winnt32 /cmd:z:\i386\winnt /a

B. winnt32 /cmd:z:\support\tools\setup.exe

C. winnt /e:z:\i386\winnt32 /cmdcons

D. winnt /e:z:\support\tools\setup.exe

Correct Answer: C

QUESTION 4

You have implemented the Hisecws.inf security template on all the Windows 2000 Professional client computers in your network.A user has received a driver and utility software for an internal SCSI controller in his computer. He uses the manufacturer-provided CD to install the driver and the utility. He restarts the computer and reports that the internal SCSI controller is not working correctly. You discover that the driver is not installed correctly.What should you do?

A. Disable the security template. Reconfigure the Driver Signing option. Install the driver. Enable the security template.

B. Reconfigure the Driver Signing option. Disable the security template. Install the driver. Enable the security template.

C. Run the Sigverif command. Reconfigure the Driver Signing option. Install the driver.

D. Run the Sigverif command. Disable the security template. Install the driver. Enable the security template.

E. Run the Sfc /cancel command. Install the driver. Run the Sfc /enable command.

Correct Answer: A

QUESTION 5

A folder on your Windows 2000 Professional computer contains bitmap files that have been compressed from 2 MB to 1 MB. You want to copy one of the compressed bitmap files from your hard disk to a 1.4-MB floppy disk.When you attempt to copy the file, you receive the following error message: "Destination drive is full."What should you do?

A. Move, rather than copy, the compressed bitmap file to the floppy disk.

B. Reformat the floppy disk. Then copy the compressed bitmap file to the floppy disk.

C. Use another program to compress the bitmap file before copying it to the floppy disk.

D. Copy an empty compressed folder to the floppy disk. Then copy the compressed bitmap file to a folder on the floppy disk.

Correct Answer: C
