**QUESTION 1**

**DRAG DROP**

Your network contains a System Center 2012 R2 Configuration Manager Service Pack 1 (SP1) environment.

You need to create a collection that excludes all of the client computers that have Microsoft Office 2013 installed.

Which four actions should you perform in sequence to create the query for the collection?

To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Actions		Answer Area
Select <b>is not</b> as the Operator.		
Display the estimated execution plan.		
Browse to the new query and select the query		
Create a query-based collection that uses the Sub Selected values option.	➤	⬆
Create a query that returns all of the client computers that have Office 2013 installed.	⬅	⬇
Modify the query to use only indexed tables that are returned by the estimated execution plan.		

Correct Answer:

Actions		Answer Area
		Create a query-based collection that uses the Sub Selected values option.
Display the estimated execution plan.		Create a query that returns all of the client computers that have Office 2013 installed.
		Browse to the new query and select the query
	➤	Select <b>is not</b> as the Operator.
	⬅	
Modify the query to use only indexed tables that are returned by the estimated execution plan.		

**QUESTION 2**

**DRAG DROP**

Your network contains a System Center 2012 R2 Configuration Manager Service Pack 1 (SP1) environment. Three users named User1, User2, and User3 will perform the following tasks:

- User1 will review software metering data and inventory reports.
- User2 will deploy applications and create alerts.
- User3 will create configuration items.

You need to identify which security role must be assigned to which user.

What should you identify?

To answer, drag the appropriate security role to the correct user in the answer area. Each security role may be used once, more than once, or not at all. Additionally, you may need to drag the split bar between panes or scroll to view content.

Select and Place:

Security Role	Answer Area
Application Deployment Manager	User1 Security role
Asset Manager	User2 Security role
Compliance Settings Manager	User3 Security role

Correct Answer:

Security Role	Answer Area
	User1 Asset Manager
	User2 Application Deployment Manager
	User3 Compliance Settings Manager

\*

Box 1: Asset Manager

Grants permissions to manage the Asset Intelligence Synchronization Point, Asset Intelligence reporting classes, software inventory, hardware inventory, and metering rules.

\*

**Box 2: Application Deployment Manager**

Grants permissions to deploy applications. Administrative users who are associated with this role can view a list of applications, and they can manage deployments for applications, alerts, templates and packages, and programs.

Administrative users who are associated

with this role can also view collections and their members, status messages, queries, and conditional delivery rules.

\*

**Box 3: Compliance Settings Manager**

Grants permissions to define and monitor Compliance Settings. Administrative users associated with this role can create, modify, and delete configuration items and baselines.

They can also deploy configuration baselines to collections, and initiate compliance evaluation, and initiate remediation for non-compliant computers.

**QUESTION 3**

**DRAG DROP**

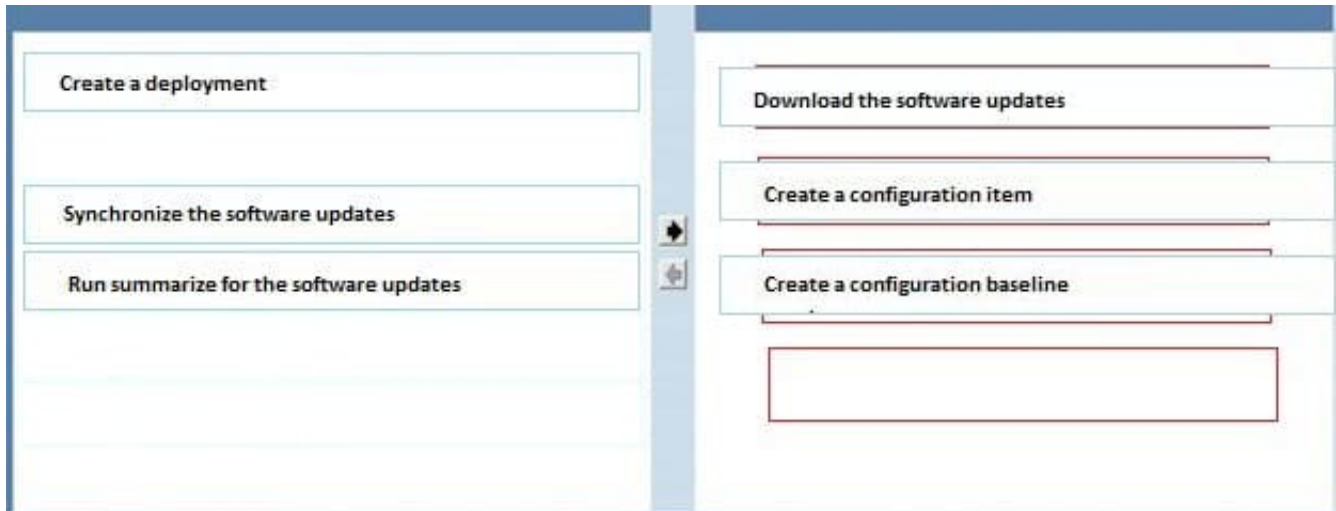

You manage a system Centre 2012 R2 Configuration Manager Service Pack1 (SP1) standalone primary site that contains a software update point. You need to implement a configuration baseline that will contain a software updates configuration item.

Which three actions should you perform in sequence?

Select and Place:

Correct Answer:

**QUESTION 4**

**HOTSPOT**

You have a System Center 2012 R2 Configuration Manager Service Pack 1 (SP1) deployment.

You have two domain users named User1 and User2.

The users will perform the following administrative tasks:

- User1 will create device collections.
- User2 will create and deploy configuration baselines.

You need to identify to which security role each user must be added. The solution must use the principle of least privilege. Which security roles should you identify? To answer, select the appropriate options in the answer area.

Hot Area:

**Answer Area**

**Option**

User1:

	▼
Application Author	
Asset Manager	
Company Resource Access Manager	
Operations Administrator	

User2:

	▼
Application Deployment Manager	
Company Resource Access Manager	
Asset Manager	
Compliance Settings Manager	
Security Administrator	

Correct Answer:

**Answer Area**

**Option**

User1:

Application Author
<b>Asset Manager</b>
Company Resource Access Manager
Operations Administrator

User2:

Application Deployment Manager
Company Resource Access Manager
Asset Manager
<b>Compliance Settings Manager</b>
Security Administrator

**QUESTION 5**

DRAG DROP

You have a System Center 2012 R2 Configuration Manager Service Pack 1 (SP1) standalone primary site.

You use Configuration Manager to deploy software updates to client computers.

You plan to monitor the software update deployment process from a client computer.

You need to collect data as quickly as possible to monitor the software update deployment process.

Which actions should you initiate from the client computer? To answer, drag the appropriate actions to the correct locations. Each action may be used once, more than once, or not at all. You may need to drag the split bar between panes or

scroll to view content.

Select and Place:

**Actions**

- Discovery Data Collection Cycle
- Machine Policy Retrieval and Evaluation Cycle
- Software Inventory Cycle
- Software Updates Deployment Evaluation Cycle
- Software Updates Scan Cycle

**Answer Area**

- First action: Action
- Second action: Software Updates Scan Cycle
- Third action: Action

Correct Answer:

**Actions**

- Discovery Data Collection Cycle
- Machine Policy Retrieval and Evaluation Cycle
- Software Inventory Cycle
- Software Updates Deployment Evaluation Cycle
- Software Updates Scan Cycle

**Answer Area**

- First action: Machine Policy Retrieval and Evaluation Cycle
- Second action: Software Updates Scan Cycle
- Third action: Software Updates Deployment Evaluation Cycle
