QUESTION 1

You create a User Profile Synchronization connection.

You need to grant the necessary permissions to the synchronization account.

What should you do?

- A. Grant the account Full Control on the ActiveUsers OU.
- B. Grant the account Full Control on the AuthenticatedUsers AD security group.
- C. Grant the account Read permission on the domain.
- D. Grant the account the Replicate Directory Changes permission on the domain.

Correct Answer: D

QUESTION 2

You are a SharePoint farm administrator.

When you attempt to navigate to the SharePoint home page, you receive an application error message that includes a correlation ID. The diagnostic logs do not

contain the error corresponding to the correlation ID.

You need to adjust the diagnostic logging level to capture all events.

Which least critical event should you select? (To answer, select the appropriate event from the drop-down list.)

Hot Area:

Answer Area

Least critical event to report to the trace log

Reset to default
None
Unexpected
Monitorable
High
Medium
Verbose

Correct Answer:

Answer Area

Least critical event to report to the trace log

Reset to default
None
Unexpected
Monitorable
High
Medium
Verbose

Note: In regards to the cross-domain comments, even if it is cross-domain, you can allow the target domain under Site Collection Settings, HTML Field Security.

QUESTION 3

You need to implement Office 365 authentication.

What should you do?

- A. Create an AD DS domain named proseware.com and join the AD FS servers to the proseware.com domain.
- B. Add a DNS CNAME record for www.proseware.com and point it to www.adatum.com.
- C. Deploy an AD FS proxy for the proseware.com domain.
- D. Add proseware.com as an Office 365 SSO domain and update all user principal names (UPNs) to also use proseware.com.

Correct Answer: D

QUESTION 4

You are the administrator for a SharePoint 2010 farm. You install and deploy a SharePoint 2013 farm.

The SharePoint 2013 farm must use the content from the SharePoint 2010 farm.

You need to upgrade from SharePoint 2010 mode to SharePoint 2013 mode.

Which four actions should you perform in sequence? (To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.)

Select and Place:

Actions	Answer Area
Set the SharePoint 2010 content databases to Read-Only . Then back up the content databases from the SharePoint 2010 farm and copy the backups to the SharePoint 2013 farm.	
Restore the SharePoint 2010 content databases to the Microsoft SQL Server instance in the SharePoint 2013 farm.	
Create a web application in the SharePoint 2013 farm for each web application in the SharePoint 2010 farm. Attach the content databases to the web applications.	
Set the content databases to Read/Write in the SharePoint 2013 farm.	
Run site collection health checks in the SharePoint 2013 farm.	
Upgrade individual site collections in the SharePoint 2013 farm.	

Correct Answer:

Actions	Answer Area
	Set the SharePoint 2010 content databases to Read-Only . Then back up the content databases from the SharePoint 2010 farm and copy the backups to the SharePoint 2013 farm.
	Restore the SharePoint 2010 content databases to the Microsoft SQL Server instance in the SharePoint 2013 farm.
Create a web application in the SharePoint 2013 farm for each web application in the SharePoint 2010 farm. Attach the content databases to the web applications.	Set the content databases to Read/Write in the SharePoint 2013 farm.
Run site collection health checks in the SharePoint 2013 farm.	Upgrade individual site collections in the SharePoint 2013 farm.

Note:

* (step 1) Create new farm, set old farm to read-only

* (step 2) With the farm and databases in read-only mode, a server farm administrator backs up the content and service application databases from the SQL Server instance on the SharePoint 2010 Products farm.

* (step 3) The server farm administrator restores a copy of the databases to the SQL Server instance on the SharePoint 2013 farm and sets the databases to readwrite on the new farm.

* (Step 4) The final stage in the upgrade process is to upgrade the site collections.

QUESTION 5

You are configuring the IIS website settings for a SharePoint application in the Create New Web Application wizard.

You need to ensure that the settings meet the technical requirements.

Which configuration option should you change? (To answer, select the appropriate option in the answer area.)

Hot Area:

IIS Web Site

Choose between using an existing IIS web site or create a new one to serve the Microsoft SharePoint Foundation application.

If you select an existing IIS web site, that web site must exist on all servers in the farm and have the same name, or this action will not succeed.

If you opt to create a new IIS web site, it will be automatically created on all servers in the farm. If an IIS setting that you want to change is not shown here, you can use this option to create the basic site, then update it using the standard IIS tools.

<input type="radio"/>	Use an existing IIS web site
	Default Web Site
<input checked="" type="radio"/>	Create a new IIS web site
	Name
	SharePoint App1
	Port
	8000
	Host Header
	intranet.contoso.com
	Path
	d:\data\app1

Correct Answer:

IIS Web Site

Choose between using an existing IIS web site or create a new one to serve the Microsoft SharePoint Foundation application.

If you select an existing IIS web site, that web site must exist on all servers in the farm and have the same name, or this action will not succeed.

If you opt to create a new IIS web site, it will be automatically created on all servers in the farm. If an IIS setting that you want to change is not shown here, you can use this option to create the basic site, then update it using the standard IIS tools.

Use an existing IIS web site
Default Web Site

Create a new IIS web site

Name
SharePoint App1

Port
9000

Host Header
intranet.contoso.com

Path
d:\data\app1

* From scenario:

All SharePoint sites and apps must listen on port 9000. The main lab SharePoint site is located at lab.intranet.contoso.com. A test site for a project named

Project2 exists under

lab.intranet.contoso.com/corp.
