QUESTION 1

You need to select the appropriate authentication method for App1. What should you do?

A. Use classic mode authentication and set the authentication type to NTLM.

B. Use classic mode authentication and set the authentication type to Kerberos.

C. Use the SharePoint server-to-server security token service (STS).

D. Use the Open Authorization 2.0 (OAuth 2.0) web authorization protocol.

Correct Answer: D

QUESTION 2

You need to configure the environment for confidential documents.

Which three actions should you perform in sequence? (To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.)

Select and Place:

	Answer Area
Activate the policy feature.	
Associate the policy feature with a document library.	
In the Site Collection Policies Gallery, create a policy feature.	
In Central Administration, create a security policy feature.	
Associate the content type with a document library.	
Associate the policy feature with the restricted content type.	

Correct Answer:

Box 1: In the Site Collection Policies Gallery, create a policy feature.

Box 2: Associate the policy feature with a restricted content type.

Box 3: Activate the policy feature.

Note:

* From scenario: Changes to confidential documents must be logged.

* Policy features are implemented as programs that run on SharePoint Server 2013. They can be enabled and configured by a server administrator and, when they

are enabled, they can be used by site administrators to define policies.

* To implement a policy, associate it with content types, libraries, or lists in sites.

* The top-level site of a site collection includes a Site Collection Policies gallery where administrators of the top-level site can create new policies. After creating a

Site Collection policy, you can export it so that administrators of other site collections can import it into their Site Collection Policies galleries. This lets you

standardize policies across your organization.

* You can associate a policy with a library, list, or content type in the following ways:

A) Associate policy features with a Site Collection policy and then associate that policy with a content type or with a list or library.

B) Associate a set of policy features directly with a content type, and then add that content type to one or more lists or libraries.

C) Associate a set of policy features directly with a list or library.

Reference: Plan for information management policy in SharePoint Server 2013

QUESTION 3

You manage the term store for a company\\'s on-premises SharePoint farm. You plan to replicate the production environment term store to a development environment.

When you attempt to export the term store from the production environment, you receive the following error message:

You do not have permission to use the bulk load statement.

You need to complete the import of the term store.

What should you do?

A. Add the SharePoint farm administrator account to the SQL Server security administrator role.

B. Grant the FullControl permissions to the farm administrator account for the //MySharedl_ocation/MMS folder.

C. Use an account that has the SQL administrator role assigned to it to perform the task.

D. Add the MMS Service account to the SQL Server bulk admin role.

Correct Answer: B

QUESTION 4

DRAG DROP

You manage a SharePoint farm in an Active Directory Domain Services (AD DS) forest. You implement SharePoint Online.

You must create a products catalog site in the on-premises SharePoint 2013 environment. You must configure the authoring site before you configure other site collections.

You need to configure cross-site publishing for the on-premises products catalog site.
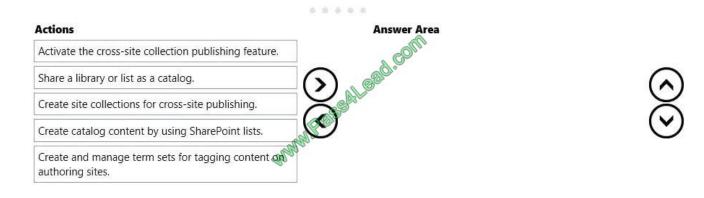

In which order should you perform the actions? To answer, move all actions from the list of actions to the answer area and arrange them in the correct order.
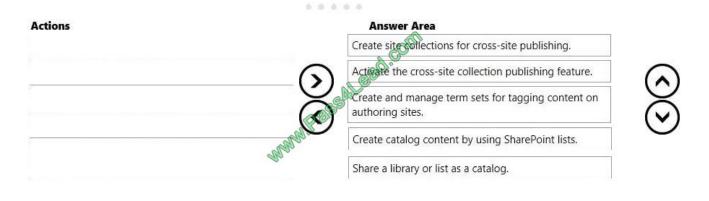

Select and Place:

Actions	Answer Area
Activate the cross-site collection publishing feature.	
Share a library or list as a catalog.	
Create site collections for cross-site publishing.	
Create catalog content by using SharePoint lists.	
Create and manage term sets for tagging content on authoring sites.	

Correct Answer:

Actions	Answer Area
	Create site collections for cross-site publishing.
	Activate the cross-site collection publishing feature.
	Create and manage term sets for tagging content on authoring sites.
	Create catalog content by using SharePoint lists.
	Share a library or list as a catalog.

QUESTION 5

You are managing a site collection in a SharePoint farm.

You need to configure the minimum level of permissions necessary for users to manage lists in the site collection.

What permission level should you configure?

A. Edit

B. Read

C. Full Control

D. View Only

Correct Answer: A
