QUESTION 1

Your company has two offices. One office is located in New York. The other office is located in Seattle. Each office has a media gateway that supports media bypass. Media bypass is enabled. The offices contain five subnets. The subnets are configured as shown in the following table.

Office	Floor	Subnet	Subnet mask
New York	First	172.16.1.0	255.255.255.0
New York	Second	172.16.2.0	255.255.255.0
New York	Third	172.16.3.0	255.255.255.0
Seattle	First	172.16.4.0	255.255.255.0
Seattle	Second	172.16.5.0	255.255.255.0

You have a Lync Server 2013 infrastructure. All client computers have Microsoft Lync 2013 deployed.

Monitoring reports show that the client computers are not using media bypass.

You run the Get-CsNetworkSubnet cmdlet and you receive the following result:

```
Identity: 172.16.0.0
MaskBits: 22
Description: New York
NetworkSiteID: New York
SubnetID: 172.16.0.0

Identity: 172.16.4.0
MaskBits: 23
Description: Seattle
NetworkSiteID: Seattle
SubnetID: 172.16.4.0
```

You need to ensure that all of the client computers use media bypass. What should you do?

- A. Delete the existing subnets. Create a single subnet entry for North America that uses a 16-bit mask.
- B. Configure the subnet in the New York office and the subnet in the Seattle office to use a 24-bit mask.
- C. Delete the existing subnets. Create five subnet entries that each uses a 24-bit mask.
- D. Delete the existing subnets. Create five subnet entries that each uses a 16-bit mask.

Correct Answer: C

QUESTION 2

You decommission the legacy PBX in the Singapore office. You configure all users in the Singapore office to route calls through their local Lync Server 2013 servers.

You need to identify the tasks that must be performed in each office to ensure that calls from Singapore meet the business requirements and the technical requirements.

Which task should you identify for each requirement?

To answer, drag the appropriate actions to the correct requirements in the answer area. Each action may be used once, more than once, or not at all. Additionally, you may need to drag the split bar between panes or scroll to view content.

Select and Place:

Actions	Answer Area
Configure pool pairing.	Minimize the cost of placing long distance calls to Europe. Action
Create a trunk between LYNC3 and LYNCGATE1.	Minimize the cost of placing long distance calls to North America. Action
Create a trunk between LYNC3 and LYNCGATE2.	Ensure that all users can place and receive calls if a single server fails. Action
Create a trunk between LYNC3 and LYNCGATE3.	

Correct Answer:

Actions	Answer Area
	Minimize the cost of placing long distance calls to Europe. Create a trunk between LYNC3 and LYNCGATE2.
	Minimize the cost of placing long distance calls to North America. Create a trunk between LYNC3 and LYNCGATE1.
Create a trunk between LYNC3 and LYNCGATE3.	Ensure that all users can place and receive calls if a single server fails. Configure pool pairing.

QUESTION 3

You have a Microsoft Exchange Server 2010 Service Pack 2 (SP2) organization and a Lync Server 2013 infrastructure. You need to design a Unified Messaging (UM) solution to meet the following requirements:

Support a peak concurrency of 500 calls.

Connect to two Lync Server 2013 pools.

What is the minimum number of UM servers required?

- A. 1
- B. 2
- C. 3
- D. 5

Correct Answer: C

QUESTION 4

You have a Lync Server 2013 infrastructure. The infrastructure contains two sites and is configured for Enterprise Voice. The sites are located in Chicago and Toronto. Each site has a distinct voice policy, PSTN usage, voice route, and trunk translation rule as shown in the following table.

Site name	Dial plan name	Voice policy name	PSTN usage name	Voice route name	Trunk name
Toronto	Toronto-DP	Toronto-VP	Toronto-Usage	Toronto-AllCalls	Toronto-PSTN
Chicago	Chicago-DP	Chicago-VP	Chicago-Usage	Chicago-AllCalls	Chicago-PSTN

The voice policy of each site contains the PSTN usage record of its respective site. The voice route of each site uses the trunk assigned to its respective site. The voice route of each site is assigned to the PSTN usage of its respective site.

You need to ensure that all outbound voice calls to the PSTN from the users in the Toronto site are routed through the trunk at the Toronto site. Calls must use the Mediation Server at the Chicago site if the Mediation Server at the Toronto site

is unavailable.

What should you do?

- A. Add the Chicago-AllCalls voice route to the Toronto-Usage PSTN usage record.
- B. Add the Chicago-Usage PSTN usage record to the Toronto-VP voice policy.
- C. Add the Chicago-PSTN trunk to the Toronto-AllCalls voice route.
- D. Add the Chicago-Usage PSTN usage record to the Toronto-PSTN trunk.

Correct Answer: B

QUESTION 5

You are evaluating the planned changes for the contractors.

You need to identify which client application the contractors will be able to use to schedule online meetings.

Which client application should you identify?

- A. Lync Web App
- B. Windows Phone devices
- C. Outlook 2010
- D. Outlook Web App

Correct Answer: C
