QUESTION 1

You plan to configure two-way federated search between SharePoint Online and SharePoint Server on-premises.

You need to identify where to configure the result source and remote provider for outbound connections from SharePoint on-premises to SharePoint Online, and for inbound connections from SharePoint Online to SharePoint on-premises.

Where should you configure the result source and remote provider for each network traffic direction? To answer, drag the appropriate option to the correct result source and remote providers. Each option may be used once, more than once,

or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

<p>Products</p> <div style="border: 1px solid black; padding: 2px; margin-bottom: 5px;">SharePoint 2016</div> <div style="border: 1px solid black; padding: 2px;">SharePoint Online</div>	<p>Answer Area</p> <table border="0" style="width: 100%;"> <tr> <td style="width: 30%;">Federated search</td> <td style="width: 20%;">Result source</td> <td style="width: 25%;">Remote provider</td> </tr> <tr> <td>Outbound search</td> <td><div style="border: 1px solid black; padding: 2px;">Product</div></td> <td><div style="border: 1px solid black; padding: 2px;">Product</div></td> </tr> <tr> <td>Inbound search</td> <td><div style="border: 1px solid black; padding: 2px;">Product</div></td> <td><div style="border: 1px solid black; padding: 2px;">Product</div></td> </tr> </table>	Federated search	Result source	Remote provider	Outbound search	<div style="border: 1px solid black; padding: 2px;">Product</div>	<div style="border: 1px solid black; padding: 2px;">Product</div>	Inbound search	<div style="border: 1px solid black; padding: 2px;">Product</div>	<div style="border: 1px solid black; padding: 2px;">Product</div>
Federated search	Result source	Remote provider								
Outbound search	<div style="border: 1px solid black; padding: 2px;">Product</div>	<div style="border: 1px solid black; padding: 2px;">Product</div>								
Inbound search	<div style="border: 1px solid black; padding: 2px;">Product</div>	<div style="border: 1px solid black; padding: 2px;">Product</div>								

Correct Answer:

<p>Products</p> <div style="border: 1px solid black; padding: 2px; margin-bottom: 5px;">SharePoint 2016</div> <div style="border: 1px solid black; padding: 2px;">SharePoint Online</div>	<p>Answer Area</p> <table border="0" style="width: 100%;"> <tr> <td style="width: 30%;">Federated search</td> <td style="width: 20%;">Result source</td> <td style="width: 25%;">Remote provider</td> </tr> <tr> <td>Outbound search</td> <td><div style="border: 1px solid black; padding: 2px;">SharePoint 2016</div></td> <td><div style="border: 1px solid black; padding: 2px;">SharePoint Online</div></td> </tr> <tr> <td>Inbound search</td> <td><div style="border: 1px solid black; padding: 2px;">SharePoint Online</div></td> <td><div style="border: 1px solid black; padding: 2px;">SharePoint 2016</div></td> </tr> </table>	Federated search	Result source	Remote provider	Outbound search	<div style="border: 1px solid black; padding: 2px;">SharePoint 2016</div>	<div style="border: 1px solid black; padding: 2px;">SharePoint Online</div>	Inbound search	<div style="border: 1px solid black; padding: 2px;">SharePoint Online</div>	<div style="border: 1px solid black; padding: 2px;">SharePoint 2016</div>
Federated search	Result source	Remote provider								
Outbound search	<div style="border: 1px solid black; padding: 2px;">SharePoint 2016</div>	<div style="border: 1px solid black; padding: 2px;">SharePoint Online</div>								
Inbound search	<div style="border: 1px solid black; padding: 2px;">SharePoint Online</div>	<div style="border: 1px solid black; padding: 2px;">SharePoint 2016</div>								

QUESTION 2

You are customizing standard content types for an organization. For the tracking of a department, you must allow users to easily select or enter a value.

In some cases, users may refer to a single department by more than one name. Users must be able to select or type any name for a department but the document must be associated with only one department.

You need to create a column that supports the requirements. What should you create?

A. a Choice site column that uses a drop-down menu.

- B. a Choice site column that uses check boxes
- C. a Choice list that uses a drop-down menu
- D. a Managed Metadata site column

Correct Answer: D

As per the requirement, users should be able to refer a single department with multiple names which can be achieved by synonyms of Managed Metadata Terms.

QUESTION 3

Your development team deploys a new SharePoint Store app that interacts with the user by using an FRAME.

When the user loads a SharePoint page, the IFRAME is empty.

You need to ensure that the SharePoint Store app loads properly.

How should you configure authentication and authorization for the app? To answer, select the appropriate option from each list in the answer area.

Hot Area:

Authentication	Authorization
<div style="text-align: right; border-bottom: 1px solid #ccc; margin-bottom: 5px;">▼</div> Self-signed certificate Microsoft Azure Active Directory Control	<div style="text-align: right; border-bottom: 1px solid #ccc; margin-bottom: 5px;">▼</div> user permissions app and user permissions

Correct Answer:

Authentication	Authorization
<div style="text-align: right; border-bottom: 1px solid #ccc; margin-bottom: 5px;">▼</div> Self-signed certificate Microsoft Azure Active Directory Control	<div style="text-align: right; border-bottom: 1px solid #ccc; margin-bottom: 5px;">▼</div> user permissions app and user permissions

QUESTION 4

You need to monitor the resources for the Beijing office.

Which three components should you implement? Each correct answer presents part of the solution.

- A. search
- B. proxy settings
- C. Distributed Cache
- D. SAML authentication
- E. claims authentication

Correct Answer: BDE

QUESTION 5

You need to migrate the product team site.

What should you do? To answer, drag the appropriate actions to the step. Each action may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Select and Place:

Actions	Answer area
Run the Windows PowerShell cmdlet Get-SPContentDatabase .	Step Action
Run the Windows PowerShell cmdlet Export-SPWeb .	1 Copy the URL of product team site.
Run the Windows PowerShell cmdlet Backup-SPFarm .	2 <input type="text"/> Action
Set the value of the Database Read-Only property to True .	3 Connect to ServerRole2013.
Create a Full Read user policy for the web application.	4 <input type="text"/> Action
On ServerRole2016, run the Windows PowerShell cmdlet: New-SPContentDatabase .	5 Backup the content database.
	6 Restore and attach database to ServerRole2016.

Correct Answer:

Actions

Run the Windows PowerShell cmdlet **Export-SPWeb**.

Run the Windows PowerShell cmdlet **Backup-SPFarm**.

Create a Full Read user policy for the web application.

On ServerRole2016, run the Windows PowerShell cmdlet: **New-SPContentDatabase**.

Answer area

Step

Action

1 Copy the URL of product team site.

2 Run the Windows PowerShell cmdlet **Get-SPContentDatabase**.

3 Connect to ServerRole2013.

4 Set the value of the Database Read-Only property to **True**.

5 Backup the content database.

6 Restore and attach database to ServerRole2016.
