QUESTION 1

You need to ensure that users can share sales data.

For each authentication method, which option should you use? To answer, drag the appropriate option to the correct authentication method. Each option may be used once, more than once, or not at all. You may need to drag the split bar

between panes or scroll to view content. Note: Each correct selection is worth one point.

Select and Place:

Options	Authentication method	Option
S2S authentication	Account for Office Online Services	Option
SAML authentication	Authentication for Excel Online	Option
oData authentication	Authentication for PowerPivot	Option
network Service account		
Local Administrator account		
Authenticated users		

Correct Answer:

Options	Authentication method	Option
S2S authentication	Account for Office Online Services	network Service account
SAML authentication	Authentication for Excel Online	Authenticated users
oData authentication	Authentication for PowerPivot	Authenticated users
network Service account		
Local Administrator account		
Authenticated users		

QUESTION 2

You need to implement the server environment for Seattle.

Where should you deploy the server roles? To answer, drag the appropriate server or servers to the correct roles. Each server or set of servers may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Select and Place:

Server or Servers
