QUESTION 1

You plan to implement a collaboration platform for a company. All 1,000 employees currently use Excel 2010.

You have the following requirements:

All employees must be able to co-author Excel workbooks.

You must minimize the costs associated with any solution.

You need to recommend a solution.

Which solution should you recommend?

A. Implement SharePoint 2013 with Excel Services.

B. Implement SharePoint 2013 and continue using Excel 2010.

C. Implement SharePoint Online and upgrade clients to Excel 2013.

D. Implement SharePoint 2013 with an Office Web Apps server.

Correct Answer: A

Excel services consists of three components: Excel Calculation Services, Excel Web Access, and Excel Web Services. Excel Web Access allows for co-authoring of Excel workbooks.

QUESTION 2

You are the Office 365 administrator for your company.

The company uses Microsoft Lync Online and wants to customize Lync meeting invitations.

You need to identify the URLs that may NOT be changed on the Lync meeting invitations from the Lync admin center.

Which two URLs may NOT be changed? Each correct answer presents part of the solution.

A. Help URL

B. Company URL

C. Meeting URL

D. Legal URL

E. Logo URL

Correct Answer: BC

You can customize meeting invitations sent by the Online Meeting Add-in for Lync 2013 by including the following optional items in the body of the meeting invitation:

Note:

To Customize the MeetingInvitation by using Lync Server Control Panel

QUESTION 3

You are the Office 365 administrator for a company. You plan to use Skype for Business Online on all mobile devices. Employees currently use the following device types:

Android

iOS

Nokia Symbian

Windows Phone

Some users report that they do not receive push notifications. Skype for Business Online must be able to send push notifications to all devices.

You need to open the required ports in the firewall.

Which destination port or ports should you open?

A. TCP 443

B. UDP 3478

C. TCP/UDP 50,000-59,999

D. TCP 5223

Correct Answer: D

Skype for Business mobile push notifications uses TCP port 5223.

QUESTION 4

You are the Office 365 administrator for your company. Your company uses Microsoft SharePoint Online to share documents with internal and external users.

A document associated with a bidding process was shared in the environment. Guest access to the document was provided to several vendors. The bidding process has now ended.

You need to revoke vendor access to the document.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

	Answer Area	4 / 8

In the **Users and Permissions** area, click **Access requests and invitations**.

Next to the URL for the guest link, click the **Delete** button.

In the properties window, click **Withdraw**.

Go to the Site Settings page.

Point to the document, and then click the associated **Open Menu** button.

In the **External User Invitations** area, point to each vendor you want to uninvite, and then click the associated **Open Menu** button.

Browse to the SharePoint library that contains the document.

In the sentence **Open to anyone with a guest link**, click **a guest link**.

Correct Answer:

	Answer Area
In the **Users and Permissions** area, click **Access requests and invitations**.	Browse to the SharePoint library that contains the document.
	Point to the document, and then click the associated **Open Menu** button.
In the properties window, click **Withdraw**.	In the sentence **Open to anyone with a guest link**, click **a guest link**.
Go to the Site Settings page.	Next to the URL for the guest link, click the **Delete** button.
In the **External User Invitations** area, point to each vendor you want to uninvite, and then click the associated **Open Menu** button.	

This question states that the document was shared with Guest access to the document provided to several vendors. This would have been done by providing the vendors with a 'guest link' to the document.

You can revoke access to a document that has been shared through a guest link by disabling the link.

When people outside your organization attempt to access the content using the guest link, they will see a message indicating that they cannot access it.

QUESTION 5

You are the Office 365 administrator at a large retail company.

Users in retail locations report they receive unwanted push notifications on point-of-sale mobile devices.

You need to disable push notifications to users of iOS devices.

Which four Windows PowerShell segments should you use to develop the solution? To answer, move the appropriate Windows PowerShell segments from the list of Windows PowerShell segments to the answer area and arrange them in
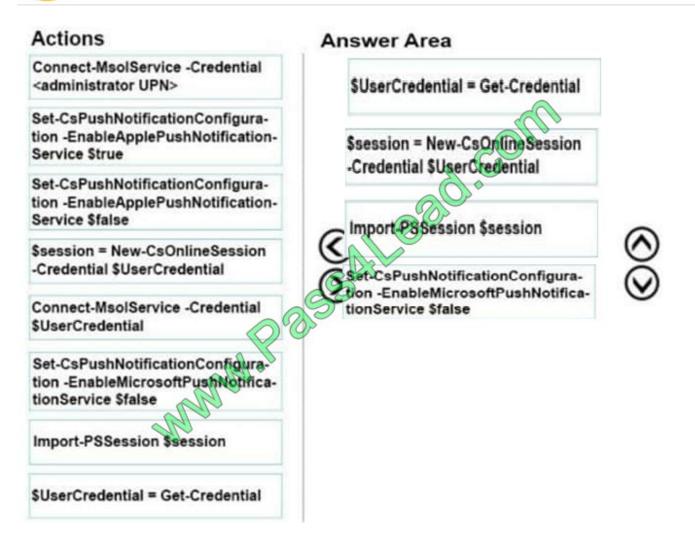

the

correct order.

Select and Place:

Actions	Answer Area
Connect-MsolService -Credential \<administrator UPN\>	
Set-CsPushNotificationConfiguration -EnableApplePushNotification-Service $true	
Set-CsPushNotificationConfiguration -EnableApplePushNotification-Service $false	
$session = New-CsOnlineSession -Credential $UserCredential	
Connect-MsolService -Credential $UserCredential	
Set-CsPushNotificationConfiguration -EnableMicrosoftPushNotificationService $false	
Import-PSSession $session	
$UserCredential = Get-Credential	

Correct Answer:

Actions

Connect-MsolService -Credential <administrator UPN>

Set-CsPushNotificationConfigura-tion -EnableApplePushNotification-Service $true

Set-CsPushNotificationConfigura-tion -EnableApplePushNotification-Service $false

$session = New-CsOnlineSession -Credential $UserCredential

Connect-MsolService -Credential $UserCredential

Set-CsPushNotificationConfigura-tion -EnableMicrosoftPushNotifica-tionService $false

Import-PSSession $session

$UserCredential = Get-Credential

Answer Area

$UserCredential = Get-Credential

$session = New-CsOnlineSession -Credential $UserCredential

Import-PSSession $session

Set-CsPushNotificationConfigura-tion -EnableMicrosoftPushNotifica-tionService $false

Box1 Creates a credentials object.

Box2 Creates a new remote Windows PowerShell session that makes a connection to Skype for Business Online.

Box2 Imports commands from another session into the current session.

Box4 Disables the Apple Push Notification Service.
