QUESTION 1

You administer 100 client devices that run Windows 10. Users do not have local administrator permissions to the devices. You need to deploy Office 365 ProPlus to all client devices while minimizing Internet bandwidth consumption and costs. What should you use?

A. An MSI installer and an Active Directory Group Policy

B. An MSI installer and Microsoft Operations Management Suite (OMS)

C. An MSI installer and System Center Configuration Manager (SCCM)

D. A Click-to-Run installer from a network share

Correct Answer: C

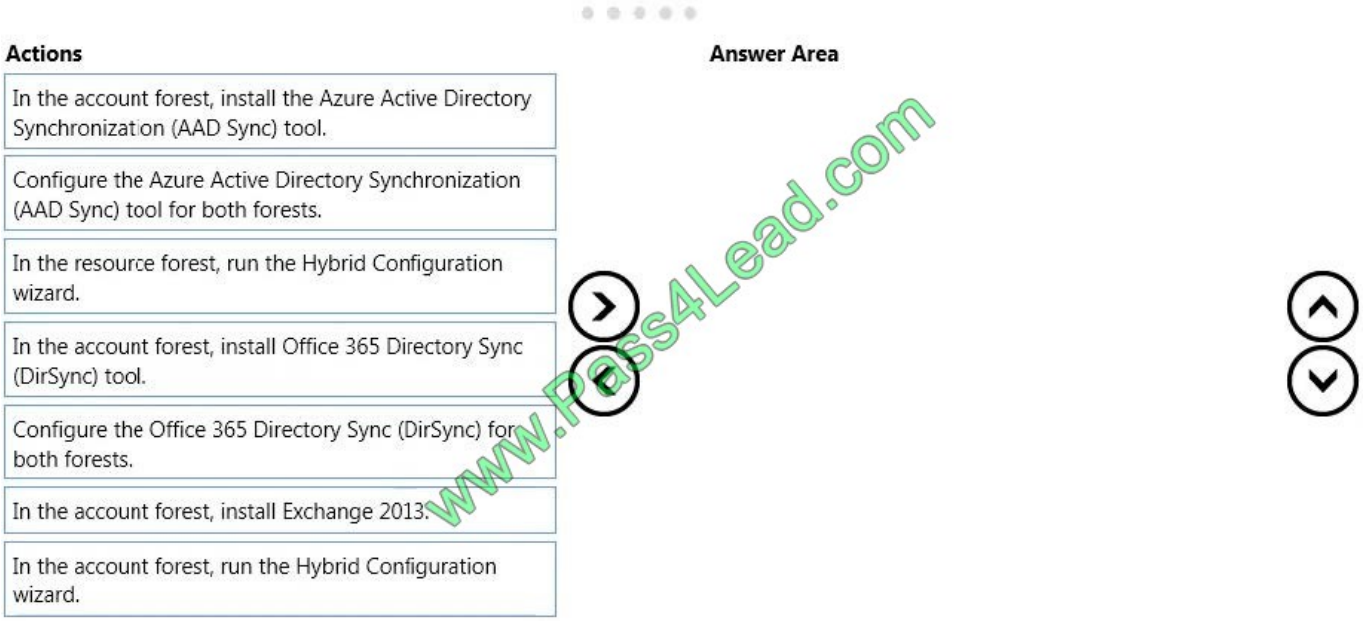
QUESTION 2

An organization has an on-premises Exchange organization that consists of two Active Directory forests in an account and resource forest configuration. The resource forest hosts Exchange 2013. You

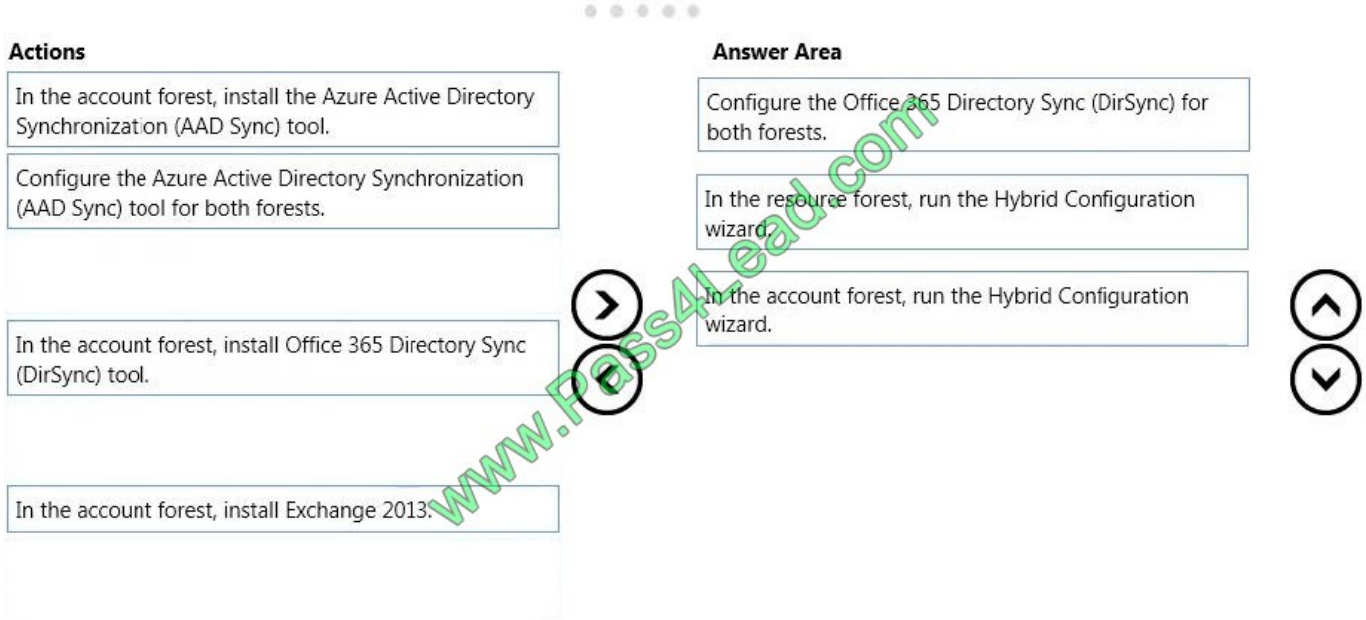
plan to migrate to Exchange Online.

You need to prepare for the migration.

Which three actions should you perform in sequence? To answer, move the appropriate actions form the list of actions to the answer area and arrange them in the correct order.



Correct Answer:



www.Pass4Lead.com

Before the migration to Exchange Online we must set up a hybrid deployment. Box 1: DirSync for both Forests

* What if I have a resource forest for Exchange and an account forest for logins?

Setup dirsync against the resource forest (this we need to do) and setup ADFS (this is already done) against the account forest. Eventually, collapse the resource forest data into the account forest and then change dirsync to work against the

account forest.

Box 2, Box 3: Run the Hybrid Configuration Wizard in each Forest

QUESTION 3

You manage Office 365 group memberships at your company. You establish a connection to Microsoft Azure Active Directory (Azure AD) by using Windows PowerShell.

You need to remove the user User1@litwareinc.com from the Sales Managers Office 365 group.

Which two Windows PowerShell commands should you run in sequence? To answer, select the appropriate Windows PowerShell in the dialog box in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Correct Answer:

QUESTION 4

You are the Office 365 administrator for a company. Only the administrators group has permissions to create sites in Microsoft SharePoint Online.

You must create a SharePoint Online site that meets the following requirements:

Broadcast product release information to all employees.

Display images and brief descriptions of products.

Ensure that only the marketing manager can modify the site.

You need to create the SharePoint Online site.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Actions	Answer Area
Click **Create site** and select Team site.	
Click **Create site** and select Communication site.	
Connect to the Office 365 SharePoint home page as the marketing manager.	
Connect to the Office 365 SharePoint home page as an administrator.	
Select the **Topic** site design option.	
Select the **Showcase** site design option.	

Correct Answer:

Actions	Answer Area
Click **Create site** and select Team site.	Connect to the Office 365 SharePoint home page as an administrator.
	Click **Create site** and select Communication site.
Connect to the Office 365 SharePoint home page as the marketing manager.	Select the **Showcase** site design option.
Select the **Topic** site design option.
