QUESTION 1

You have a SharePoint Server 2013 server farm.

Active Directory attributes are imported to user profiles.

You need to ensure that if users change the mobile phone number in their SharePoint user profile, the new information will be copied to their Active Directory user account.

Which Active Directory permission should you assign to the synchronization account?

A. Read All Properties

B. Manage Replication Topology

C. Write All Properties

D. Replicate Directory Changes

Correct Answer: D

Explanation: The synchronization account for a connection to Active Directory Domain Services (AD DS) must have the following permissions: It must have Replicate Directory Changes permission on the domain with which you\\'ll synchronize.

Note: The Replicate Directory Changes permission enables the synchronization account to read AD DS objects and to discover AD DS objects that have been changed in the domain. The Grant Replicate Directory Changes permission does not enable an account to create, modify or delete AD DS objects.

QUESTION 2

You are managing a SharePoint farm.

You need to ensure that new content is included in search results as soon as possible.

What should you do?

A. Configure on-demand crawling.

B. Configure an incremental crawl to run every 30 minutes.

C. Configure continuous crawling.

D. Add an additional index server to the farm.

E. Configure an incremental crawl to run every day.

F. Reset the search index.

Correct Answer: C

QUESTION 3

A company\\'s SharePoint environment contains three web applications.

The company must record the following information for each document in any of the three web applications:

The date and time at which the document was last reviewed. Additional custom date and time information as requirements are identified.

You have the following requirements:

Ensure that the current information is available when searching content and for refining search results.

Ensure that the additional custom date and time information can be assigned to content in all web applications.

Ensure that SharePoint users who are not farm administrators can record additional date and time information as required.

You need to meet the requirements.

What should you do?

A. Create a column of data type Date and Time in a document library in each site collection.

B. In Central Administration, create a term set with a term of data type Date and Time.

C. Create a content type that uses a custom field of data type Date and Time in each site collection.

D. Create a site column of data type Date and Time in each site collection.

Correct Answer: B

QUESTION 4

You need to implement Office 365 authentication. What should you do?

A. Create an AD DS domain named proseware.com and join the AD FS servers to the proseware.com domain.

B. Add a DNS CNAME record for www.proseware.com and point it to www.adatum.com.

C. Deploy an AD FS proxy for the proseware.com domain.

D. Add proseware.com as an Office 365 SSO domain and update all user principal names (UPNs) to also use proseware.com.

Correct Answer: D

QUESTION 5

You have a SharePoint Server 2013 server farm.

The farm has four front-end Web servers.

You have a master page named Contoso.master. The master page contains an image file that is 50 KB.

You need to recommend a solution to cache content.

The solution must meet the following requirements:

The image must be stored physically on each front-end Web server.

Authentication information must be cached and replicated on all of the font-end Web servers.

The pages generated by using Contoso.master and all of the page layouts must be stored in the memory of each front-end Web server.

Which caching mechanism should you recommend for each requirement? (To answer, drag the appropriate caching mechanisms to the correct requirements. Each caching mechanism may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.)
