QUESTION 1

You have a network printer connected to print server. You need to be able to print if print server goes down.

What should you configure?

A. branch office direct printing

B. printer pooling

C. spooling

D. Print forwarding

Correct Answer: A

Branch Office Direct Printing can reduce Wide Area Network (WAN) usage by printing directly to a print device instead of a server print queue. This feature can be enabled or disabled on a per printer basis and is transparent to the user. It is

enabled by an administrator using the Print Management Console or Windows PowerShell on the server.

The printer information is cached in the branch office, so that if the print server is unavailable for some reason (for example if the WAN link to the data center is down), then it is still possible for the user to print.

Branch Office Direct Printing requires the following operating systems:

Windows Server 2012

Windows 8

QUESTION 2

Your network contains an Active Directory domain named adatum.com. The domain contains a server named FileServer1 that runs Windows Server 2012 R2. The File Server role service is installed on FileServer1.

On FileServer1, you create a shared folder named Data.

All users have laptop computers that run Windows 10. The users are frequently disconnected from the network.

You need to ensure that when users open files from the Data share, the files are available automatically to the users when the users work offline.

Which tool should you use on FileServer1? To answer, select the appropriate tool in the answer area.

QUESTION 3

Your network contains an Active Directory domain named contoso.com. All servers run Windows Server 2012 R2. All client computers run Windows 8.

The domain contains a security group named Group1.

You have a Group Policy object (GPO) named GP01. GPO1 is linked to the domain. You need to ensure that only the members of Group1 can run the applications shown in the following table.

Application name	Application file
App1	App1.com
App2	App2.js
App3	App3.appx

Which type of application control policy should you implement for each application? To answer, drag the appropriate rule types to the correct applications. Each rule type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

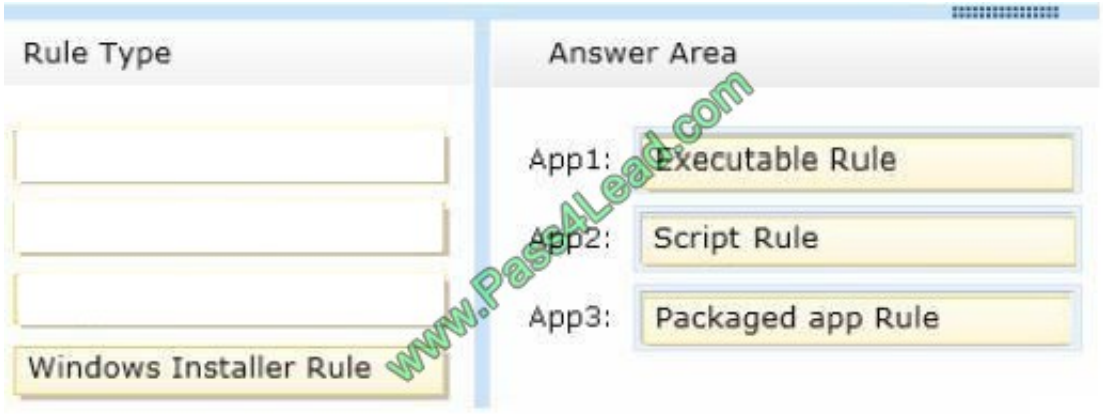
Correct Answer:



QUESTION 4

You have a Hyper-V host named Server1 that runs Windows Server 2008 R2. All of the virtual machines on Server1 use VHDs. You install the Hyper-V server role on a server named Server2 that runs Windows Server 2012 R2. Server2 has the same hardware configurations as Server1. You plan to migrate the Hyper-V host from Server1 to Server2 by using the Windows Server Migration Tools. In the table below, identify what can be migrated by using the Windows Server Migration Tools. Make only one selection in each row. Each correct selection is worth one point.
