QUESTION 1

Your network contains a Virtual Desktop Infrastructure (VDI). The VDI contains four servers. The servers are configured as shown in the following table.

Server name	Role service
Server1	Remote Desktop Virtualization Host
Server2	Remote Desktop Web Access
Server3	Remote Desktop Gateway
Server4	Remote Desktop Connection Broker

You create a virtual desktop collection. The virtual desktop collection supports 100 users.

You need to identify how much processor time each virtual machine consumes.

Which performance object should you monitor on Server1?

A. Hyper-V Hypervisor Virtual Processor

B. Terminal Services Session

C. Processor

D. Hyper-V Hypervisor Logical Processor

Correct Answer: A

QUESTION 2

You need to configure a Group Policy object (GPO) that meets the security requirements of the users in the New York office. Which Group Policy settings should you configure?

A. Allow installation of devices that match any of these device setup classes Prevent installation of devices not described by other policy settings

B. All Removable Storage classes: Deny all access Prevent installation of devices not described by other policy settings

C. Allow installation of devices that match any of these device setup classes Prevent installation of devices using drivers that match these device setup classes

D. All Removable Storage classes: Deny all access Prevent installation of devices using drivers that match these device setup classes

Correct Answer: C

QUESTION 3

You plan to deploy a Virtual Desktop Infrastructure (VDI) that has RemoteFX USB redirection enabled.

You need to identify which USB devices can be redirected to the Remote Desktop sessions.
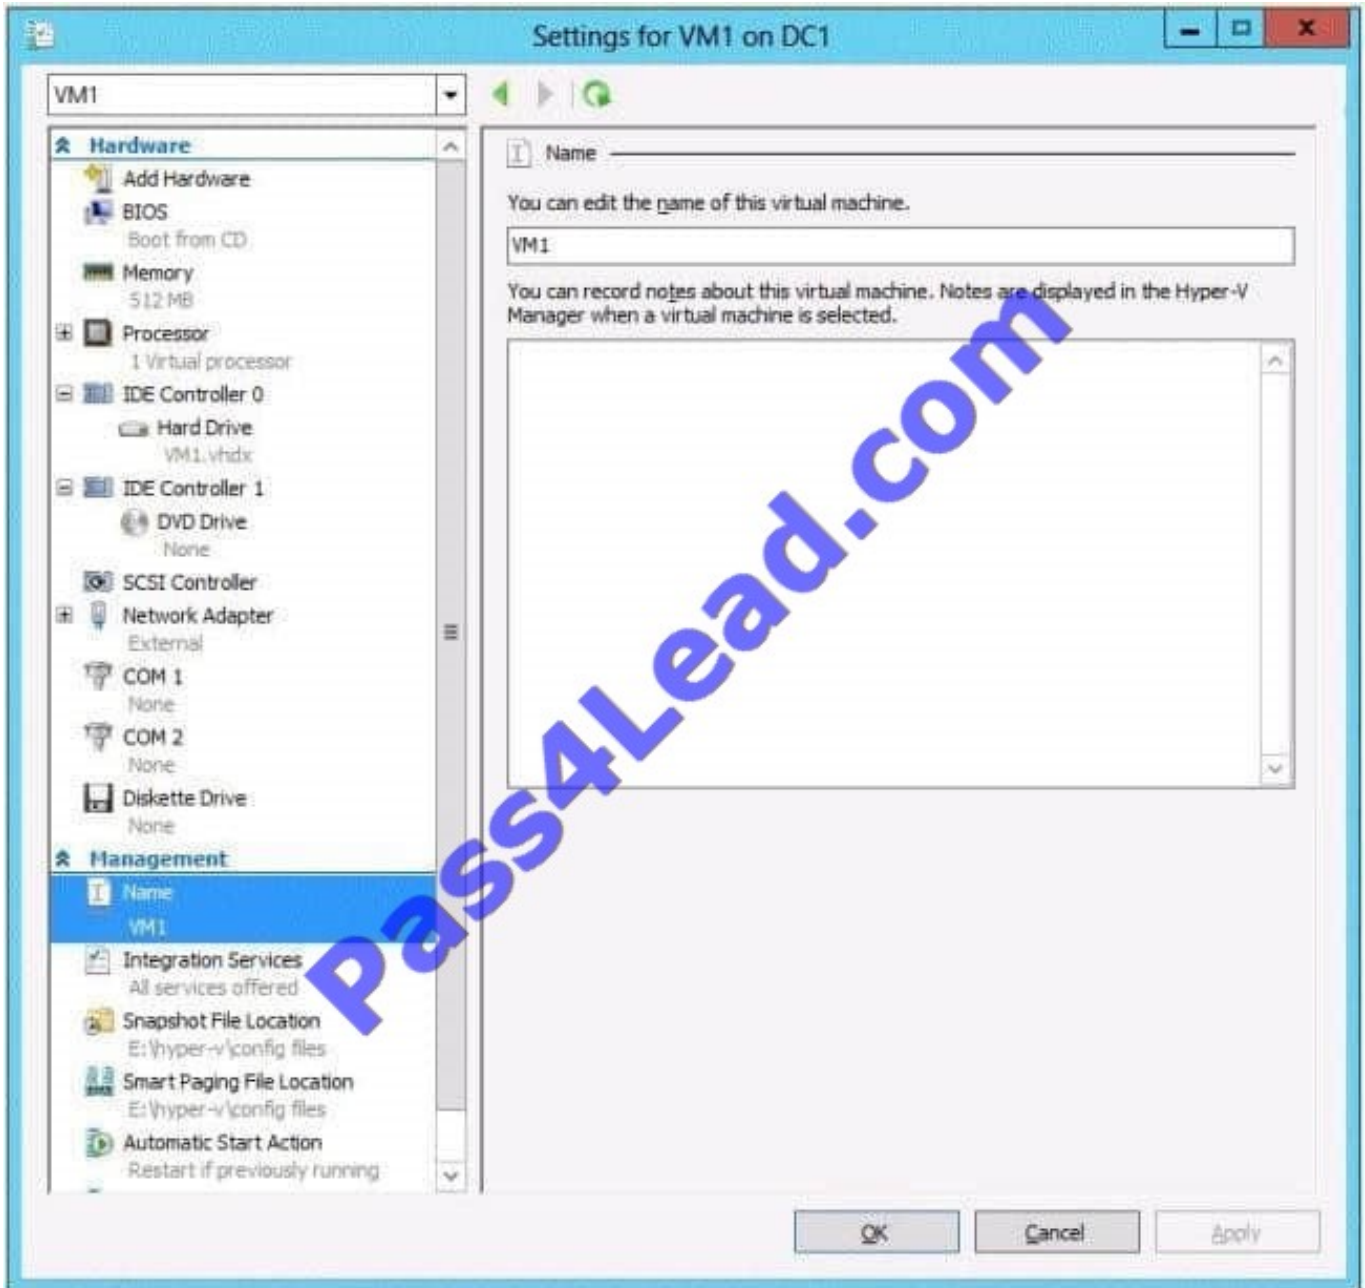

Which devices should you identify? (Each correct answer presents part of the solution. Choose all that apply.)

A. a network adapter

B. a smart card reader

C. a webcam

D. a Voice over IP (VoIP) headset

E. a scanner

Correct Answer: BCE

QUESTION 4

Your network contains a server named Server1 that runs Windows Server 2012. Server1 has the Windows Deployment Services server role installed. You have a virtual machine named VM1. VM1 is configured as shown in the exhibit. (Click the Exhibit button.)

You need to ensure that you can capture an image of VM1 by using Windows Deployment Services (WDS). What should you do?

A. Add a legacy network adapter to VM1 and a capture image to Server1.

B. Add an install image and a capture image to Server1.

C. Add a legacy network adapter to VM1 and a discovery image to Server1.

D. Add a discovery image and a capture image to Server1.

Correct Answer: A

QUESTION 5

Your company has a main office and multiple branch offices.

The network contains an Active Directory domain named contoso.com. All servers run Windows Server 2008 R2. All client computers run Windows 7.

All users are configured to use roaming profiles and Folder Redirection. Each user has a personal laptop computer and a personal desktop computer, Users occasionally log on to other computers.

The company introduces a new security policy, which requires that roaming profiles and redirected folders only be downloaded to the users\' personal laptop computer and desktop computer. You need to prepare the environment to meet the

new security policy. You want to achieve this goal by using the minimum amount of administrative effort.

What should you do? (Each correct answer presents part of the solution. Choose all that apply.)

A. Upgrade the Active Directory schema to Windows Server 2012.

B. Raise the domain functional level to Windows Server 2012.

C. Upgrade all of the client computers to Windows 8.

D. Raise the forest functional level to Windows Server 2012.

E. Upgrade all of the domain controllers to Windows Server 2012.

Correct Answer: BE

First upgrade the domain controller to Windows Server 2012, then raise the domain functional level to 2012.
