QUESTION 1

You need to recommend a solution to deliver the virtualized applications to the client computers. The solution must meet the application requirements.

What should you include in the recommendation?

- A. Enhanced Storage
- B. BranchCache
- C. File Replication Service (FRS)
- D. Distributed File System (DFS)

Correct Answer: D

QUESTION 2

Your company has a main office and a branch office. The main office is located in New York. The branch office is located in Toronto. The offices connect to each other by using a slow WAN link.

The network contains an Active Directory domain named contoso.com. The domain contains servers that run Windows Server 2012 and client computers that run Windows 8.

All users have several third-party applications installed. The third-party applications are updated frequently by their manufacturers.

You need to recommend an application management solution that meets the following requirements:

If the installation of an application update fails, the installation must restart automatically. Administrators must be able to generate reports that contain a list of all the failed installations of application updates.

Which application management solution should you recommend? More than one answer choice may achieve the goal. Select the BEST answer.

- A. Deploy pooled virtual desktops by using a Virtual Desktop Infrastructure (VDI).
- B. Assign applications and updates by using Group Policy.
- C. Deploy packages by using Microsoft System Center 2012 Configuration Manager.
- D. Sequence applications by using Microsoft Application Virtualization (App-V) streaming.

Correct Answer: C

QUESTION 3

Your network contains servers that run Windows Server 2012 and client computers that run Windows 8.

You plan to use Microsoft Application Virtualization (App-V) 5.0 as an application virtualization platform.

You have an application named App1. App1 requires a system restart during its installation. You install the App-V Sequencer on a client computer named CL1 that runs Windows 8.

You need to sequence App1.

Which three actions should you perform? To answer, move the three appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Actions	Answer Area
Restart the App-V Sequencer and select Modify an Existing Virtual Application Package . Update the App1.appv package.	
From the App-V Sequencer, select App1.exe as an installer for the new virtual application package.	
Run an installation of App1.exe and complete the installation.	
Restart CL1.	
From the App-V Sequencer, select I am finished installing .	

Correct Answer:

Actions	Answer Area
Restart the App-V Sequencer and select Modify an Existing Virtual Application Package . Update the App1.appv package.	From the App-V Sequencer, select App1.exe as an installer for the new virtual application package.
	Run an installation of App1.exe and complete the installation.
	From the App-V Sequencer, select I am finished installing .
Restart CL1.	

Box 1: From the App-V Sequencer, select App1.exe as an installer for the new virtual application package.

Box 2: Run an installation of App1.exe and complete the installation.

Box 3: From the App-V Sequencer, select I am finished installing.

**QUESTION 4**

You publish App3 as a RemoteApp program.

You need to configure App3 to meet the application requirements.

What should you do?

- A. On the RD Session Host servers, modify the Windows Installer RDS Compatibility setting. On client computers, modify the Remote Desktop Connection settings.
- B. From Remote Desktop Services, modify the properties of the App3 RemoteApp program. On the client computers, configure the RemoteApp and Desktop Connection feed.
- C. From Remote Desktop Services, modify the properties of the collection to which the App3 RemoteApp program is published. On the client computers, configure the RemoteApp and Desktop Connection feed.
- D. From Remote Desktop Services, modify the properties of the collection to which the App3 RemoteApp program is published. On client computers, modify the Remote Desktop Connection settings.

Correct Answer: B

QUESTION 5

Your company plans to deploy a Microsoft Application Visualization (App-V) 5.0 infrastructure. You need to recommend a strategy to ensure that you can manage the App-V 5.0 infrastructure if a single management server fails. What should you include in the recommendation? More than one answer choice may achieve the goal. Select the BEST answer.

- A. Failover Clustering
- B. Database mirroring
- C. Network Load Balancing (NLB)
- D. DNS round robin

Correct Answer: C
