QUESTION 1

You are a database developer and you have about two years experience in creating business Intelligence (BI) by using SQL Server2008.

Currently you are employed in a company named NaproStar which uses SQL Server2008. You work as the technical support. Now you are in charge of a SQL Server 2008 Analysis Services (SSAS) database.

You get report from users saying that some queries run slowly. As the technical support, you have to check and identify the problem.

You intend to use SQL Profiler to troubleshoot query performance. Of the following trace events, which one should you choose?

A. You should choose to use Query Subcube

B. You should choose to use MDX Script End.

C. You should choose to use Get Data from Cache

D. You should choose to use Query Cube End

Correct Answer: A

QUESTION 2

You are a database developer and you have about two years experience in creating business intelligence (BI) solutions by using SQL Server2008.

Now you are employed in a company which is named NaproStar and work as the technical support for the company which uses SQL Server2008.

You are in charge of a SQL Server 2008 Reporting Services (SSRS) instance with several reports contained.

Then you use the Business Intelligence Development Studio (BIDS) to have a report project configured on the instance.

After the deployment, you notice that the test data sources of the report project substitute the production data sources on the instance, so you should find a solution to make sure that the deployment of the report project in future will not affect

the existing reports, that is to say, all the data in the existing reports will not be changed or replaced.

What action should you perform?

A. You should have the TargetReportFolder property configured on the instance

B. You should have the OverwriteReportFolder property configured on the instance

C. You should have the OverwriteDataSources property configured on the instance

D. You should have the TargetServerURL property configured on the instance

E. You should have the TargetDataSourceFolder property configured on the instance

Correct Answer: C

QUESTION 3

You create a SQL Server 2008 Analysis Services (SSAS) solution. Your solution contains a time dimension named DimTime that contains a hierarchy named Yr-Qtr-Mth.

You have a measure named Amount from a measure group named Measures.

You need to create a calculated member to display the Amount measure in the previous time period for the current level of the Yr-Qtr-Mth hierarchy.

Which expression should you use?

A. ([Measures]. [Amount], OPENINGPERIOD([DimTime].[Yr-Qtr-Mth] .FirstSibling.Level))

B. ([Measures]. [Amount], LASTPERIODS(0,[DimTime].[Yr-Qtr-Mth].PrevMember))

C. ([Measures]. [Amount], [DimTime].[Yr-Qtr-Mth].PrevMember)

D. ([Measures]. [Amount], [DimTime].[Yr-Qtr-Mth].FirstSibling)

Correct Answer: C

PrevMember returns the previous member in the level that contains a specified member.

Incorrect answer:

FirstSibling returns the first child of the parent of a member. LastPeriods returns a set of members up to and including a specified member

QUESTION 4

You plan to deploy SQL Server 2008 Reporting Services (SSRS) on a SQL Server 2008 failover cluster. Internet Information Services (IIS) is installed on both nodes of the cluster. The IIS is virtualized on the Network Load Balancing (NLB)

cluster. You need to deploy SSRS in a fault- tolerant scale-out deployment.

What should you do?

A. Install SSRS on both cluster nodes to use separate ReportServer databases.

B. Install SSRS on both cluster nodes to use the same ReportServer database.

C. Install SSRS on both cluster nodes and cluster the SSRS service by using a new resource group.

D. Install SSRS on both cluster nodes and cluster the SSRS service by using the SQL Server resource group.

Correct Answer: B

QUESTION 5

You work for an organization with global operations. You are responsible for the SQL Server 2008 Integration Services (SSIS) instance. You develop SSIS packages to load daily and weekly feeds. These packages are deployed via the SQL

Server method.

The servers reside in geographies with a high risk of natural disaster.

You need to implement a disaster recovery plan to back up the SSIS packages for availability.

What should you back up?

A. The model database

B. The package folder

C. The master database

D. The MSDB database

Correct Answer: D
