Following Questions and Answers are all new published by Microsoft Official Exam Center

QUESTION 1

You work as a senior database administrator at ABC.com. The ABC.com network consists of a single domain named ABC.com. ABC.com makes use of Microsoft SQL Server 2012 in their environment.

ABC.com has a SQL Server Integration Services (SSIS) package that is currently deployed on the file system. The package is configured to interact work together with an outside vendor data feed. It has been reported that the outside vendor

data feed is erratic as a result of network failures and slow response times. You have been instructed to investigate the problem. Your solution must include information about the Start Time, End Time, Execution Result, and Execution

Duration of the package.

You start by creating a new project and adding the package to it. You then deployed the package to the msdb database.

Which of the following actions should you take NEXT?

A. You should consider querying the ExecutionlLog table.

B. You should consider viewing the SSISDB catalog.

C. You should consider viewing the SQL Agent Error Log.

D. You should consider viewing the SQL Server Log.

Correct Answer: A

QUESTION 2

You work as a database developer at ABC.com. The ABC.com network consists of a single domain named ABC.com. ABC.com makes use of Microsoft SQL Server 2012 in their environment.

You are in the process of creating a SQL Server Integration Services (SSIS) data flow. The data flow must be configured to make data from various external data sources available to the other components in the data flow.

Which of the following actions should you take?

A. You should consider making use of the expressions data flow component.

B. You should consider making use of the source data flow component.

C. You should consider making use of the transformations data flow component.

D. You should consider making use of the destination data flow component.

Correct Answer: B

QUESTION 3

A SQL Server Integration Services (SSIS) project has been deployed to the SSIS catalog. The project includes a project Connection Manager to connect to the data warehouse. The SSIS catalog includes two Environments:
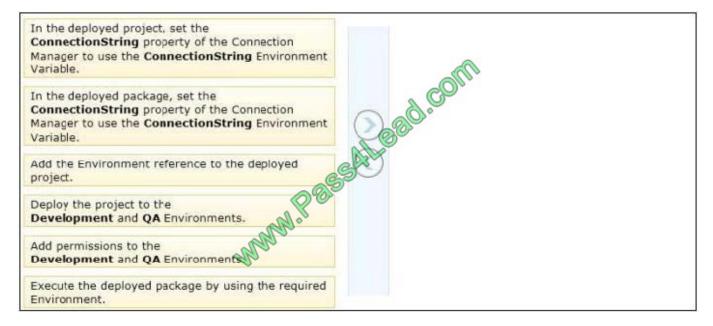

Development

QA

Each Environment defines a single Environment Variable named ConnectionString of type string. The value of each variable consists of the connection string to the development or QA data warehouses.

You need to be able to execute deployed packages by using either of the defined Environments.

Which three actions should you perform in sequence? (To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.)
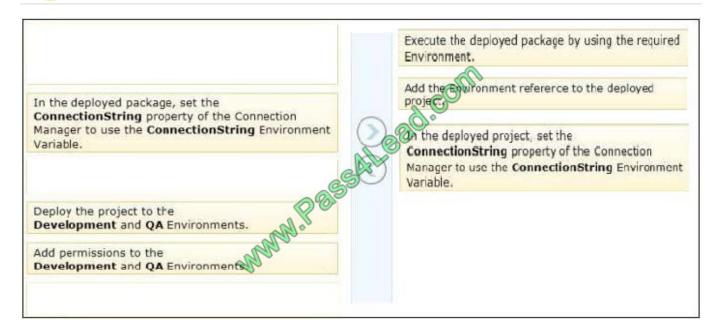

Select and Place:

Correct Answer:

QUESTION 4

You are using a SQL Server Integration Services (SSIS) project that is stored in the SSIS catalog. An Environment has been defined in the SSIS catalog.

You need to add the Environment to the project.

Which stored procedure should you use?

A. catalog.set_environment_reference_type

B. catalog.set_environment_property

C. catalog.create_environment_reference

D. catalog.create_environment

Correct Answer: C

Environments (Test, Production etc) are associated with projects by creating references to the environments in the projects.

QUESTION 5

You work as a senior database administrator at ABC.com. The ABC.com network consists of a single domain named ABC.com. ABC.com makes use of Microsoft SQL Server 2012 in their environment. You are hosting a training exercise for Microsoft SQL Server 2012 administrators. You are currently discussing the Fuzzy Lookup transformation.

Which of the following is TRUE with regards to the Fuzzy Lookup similarity threshold setting? (Choose all that apply.)

A. Increasing the threshold can improve the speed of matching.

B. Increasing the threshold can deteriorate the speed of matching.

C. The nearer the value is to 1, the nearer the resemblance of the lookup value to the source value must be to qualify as a match.

D. The nearer the value is to 1, the further the resemblance of the lookup value to the source value must be to qualify as a match.

Correct Answer: AC
