QUESTION 1

Your network contains a server named Server1 that runs SQL Server 2012. Server1 contains an instance named Instance1. Instance1 contains a database named ContentDatabase.

ContentDatabase uses transaction log backups.

The recovery model of ContentDatabase is set to FULL.

You need to shrink the ContentDatabase_Log log file to 10 MB. The solution must ensure that you can continue to back up the transaction log.

Which three code segments should you execute?

To answer, move the appropriate code segments from the list of code segments to the answer area and arrange them in the correct order.

Select and Place:

Correct Answer:

Answer Area

```
DBCC SHRINKFILE (ContentDatabase_Log, 10);  
GO
```

```
ALTER DATABASE ContentDatabase  
SET RECOVERY SIMPLE;  
GO
```

```
ALTER DATABASE ContentDatabase  
SET RECOVERY FULL;  
GO
```

```
ALTER DATABASE ContentDatabase  
SET PAGE_VERIFY CHECKSUM;  
GO
```

```
BACKUP LOG ContentDatabase  
WITH TRUNCATE_ONLY
```

```
DBCC SHRINKFILE (ContentDatabase_Log, 7168);  
GO
```

Answer Area

```
ALTER DATABASE ContentDatabase
SET RECOVERY SIMPLE;
GO

DBCC SHRINKFILE (ContentDatabase_Log, 10);
GO

ALTER DATABASE ContentDatabase
SET RECOVERY FULL;
GO

ALTER DATABASE ContentDatabase
SET PAGE_VERIFY CHECKSUM;
GO

BACKUP LOG ContentDatabase
WITH TRUNCATE_ONLY

DBCC SHRINKFILE (ContentDatabase_Log, 7168);
GO
```

Note:

*

Shrinking a log file to a specified target size The following example shrinks the log file in the AdventureWorks database to 1 MB. To allow the DBCC SHRINKFILE command to shrink the file, the file is first truncated by setting the database recovery model to SIMPLE. Transact-SQL USE AdventureWorks2012; GO -- Truncate the log by changing the database recovery model to SIMPLE. ALTER DATABASE AdventureWorks2012 SET RECOVERY SIMPLE; GO -- Shrink the truncated log file to 1 MB. DBCC SHRINKFILE (AdventureWorks2012_Log, 1); GO -- Reset the database recovery model. ALTER DATABASE AdventureWorks2012 SET RECOVERY FULL; GO

*

If the log file does not shrink (after dbcc shrinkfile) Typically it is the log file that appears not to shrink. This is usually the result of a log file that has not been truncated. You can truncate the log by setting the database recovery model to SIMPLE, or by backing up the log and then running the DBCC SHRINKFILE operation again.

*

DBCC SHRINKFILE shrinks the size of the specified data or log file for the current database, or empties a file by moving the data from the specified file to other files in the same filegroup, allowing the file to be removed from the database.

Arguments include:

target_size

Is the size for the file in megabytes, expressed as an integer.

**QUESTION 2**

You need to ensure that a new execution plan is used by usp_GetOrdersByProduct each time the stored procedure runs. What should you do?

- A. Execute sp_help @@usp_GetOrdersByProduct.
- B. Execute sp_recompile @@usp_GetOrdersByProduct.
- C. Add WITH RECOMPILE to line 03 in usp_GetOrdersByProduct.
- D. Add WITH (FORCESEEK) to line 07 in usp_GetOrdersByProduct.

Correct Answer: C

Ref: [http://msdn.microsoft.com/en-us/library/ms190439\(v=sql.90\).aspx](http://msdn.microsoft.com/en-us/library/ms190439(v=sql.90).aspx)

QUESTION 3

You need to implement a solution that addresses the upload requirements. Which code segment should you use to implement the Conversions assembly?

- A.

```
CREATE FUNCTION ConvertToText (@wordResume varchar(8000))
RETURNS varbinary(max)
AS EXTERNAL NAME SqlConversions.Conversions.ConvertToText;
```
- B.

```
CREATE PROCEDURE ConvertToText (@wordResume varbinary(max))
AS EXTERNAL NAME Conversions.SqlConversions.ConvertToText;
```
- C.

```
CREATE PROCEDURE ConvertToText (@wordResume varchar(8000))
AS EXTERNAL NAME SqlConversions.Conversions.ConvertToText;
```
- D.

```
CREATE FUNCTION ConvertToText (@wordResume varbinary(max))
RETURNS varchar(8000)
AS EXTERNAL NAME Conversions.SqlConversions.ConvertToText;
```

- A. Option A
- B. Option B
- C. Option C
- D. Option D

Correct Answer: D

QUESTION 4

You need to modify `usp_SelectSpeakersByName` to support server-side paging. The solution must minimize the amount of development effort required. What should you add to `usp_SelectSpeakersByName`?

- A. A table variable
- B. An OFFSET-FETCH clause
- C. The ROWNUMBER keyword
- D. A recursive common table expression

Correct Answer: B

<http://www.mssqltips.com/sqlservertip/2696/comparing-performance-for-different-sql-serverpaging-methods/>

QUESTION 5

You have a SQL Server 2012 database named `Database1`. `Database1` has a data file named `database1_data.mdf` and a transaction log file named `database1_Log.ldf`. `Database1_Data.mdf` is 1.5 GB.

`Database1_Log.ldf` is 1.5 terabytes. A full backup of `Database1` is performed every day. You need to reduce the size of the log file. The solution must ensure that you can perform transaction log backups in the future. Which code segment should you execute? To answer, move the appropriate code segments from the list of code segments to the answer area and arrange them in the correct order.

Select and Place:

Ordered List Title	Answer Choices Title
<div data-bbox="132 315 172 398"><input type="checkbox"/></div> <div data-bbox="132 398 172 481"><input type="checkbox"/></div>	<pre>ALTER DATABASE Database1 SET RECOVERY FULL ; ALTER DATABASE Database1 SET RECOVERY SIMPLE ; DBCC SHRINKFILE (Database1_Log); DBCC SHRINKFILE (Database1_Log, TRUNCATEONLY); BACKUP LOG Database1 TO Database1_Log_Backup; BACKUP LOG Database1 TO Database1_Log_Backup WITH NO_TRUNCATE; USE Database1; USE master;</pre>

Correct Answer:

Ordered List Title	Answer Choices Title
<pre>USE Database1; ALTER DATABASE Database1 SET RECOVERY SIMPLE ; DBCC SHRINKFILE (Database1_Log); ALTER DATABASE Database1 SET RECOVERY FULL</pre>	<pre>DBCC SHRINKFILE (Database1_Log, TRUNCATEONLY); BACKUP LOG Database1 TO Database1_Log_Backup; BACKUP LOG Database1 TO Database1_Log_Backup WITH NO_TRUNCATE; USE master;</pre>

Shrinking a log file to a specified target size

The following example shrinks the log file in the AdventureWorks database to 1 MB. To allow the DBCC SHRINKFILE command to shrink the file, the file is first truncated by setting the database recovery model to SIMPLE.

Transact-SQL

```
USE AdventureWorks2012;
```

```
GO
```

```
-- Truncate the log by changing the database recovery model to SIMPLE.
```

```
ALTER DATABASE AdventureWorks2012
```

```
SET RECOVERY SIMPLE;
```

```
GO
```

```
-- Shrink the truncated log file to 1 MB.
```

```
DBCC SHRINKFILE (AdventureWorks2012_Log, 1);
```

```
GO
```

-- Reset the database recovery model.

```
ALTER DATABASE AdventureWorks2012
```

```
SET RECOVERY FULL;
```

```
GO
```
