-  **800,000+** Satisfied Customers

QUESTION 1

You need to ensure that managers can successfully run reports. What should you do?

- A. Implement Kerberos delegation.
- B. Configure the SSRS data sources to store Windows credentials.
- C. Implement forms-based authentication.
- D. Configure the CustomData property in the connection strings.

Correct Answer: A

QUESTION 2

You are creating a Multidimensional Expressions (MDX) calculation for Projected Revenue in a cube.

For Product A, Projected Revenue is defined as 150 percent of the Total Sales of the product. For all other products, Projected Revenue is defined as 110 percent of the Total Sales of the product.

You need to calculate the Projected Revenue as efficiently as possible.

Which calculation should you use (More than one answer choice may achieve the goal.

Select the BEST answer.)

- A.

```
CREATE MEMBER CurrentCube.[Measures].[Projected Revenue]
AS CASE WHEN [Product].[Product Name].CurrentMember.Name = "Product A"
THEN [Measures].[Total Sales] * 1.5
ELSE [Measures].[Total Sales] * 1.1 END
```
- B.

```
CREATE MEMBER CurrentCube.[Measures].[Projected Revenue]
AS [Measures].[Total Sales] * 1.1;
SCOPE ([Product].[Product Name].MEMBERS, [Measures].[Projected Revenue]);
[Product].[Product Name].&[Product A] = [Measures].[Total Sales] * 1.5;
END SCOPE;
```
- C.

```
CREATE MEMBER CurrentCube.[Measures].[Projected Revenue]
AS [Measures].[Total Sales] * 1.1;
SCOPE ([Product].[Product Name].&[Product A], [Measures].[Projected Revenue]);
THIS = [Measures].[Total Sales] * 1.5;
END SCOPE;
```
- D.

```
CREATE MEMBER CurrentCube.[Measures].[Projected Revenue]
AS [Measures].[Total Sales];
SCOPE ([Product].[Product Name].MEMBERS, [Measures].[Projected Revenue]);
[Measures].[Total Sales] * 1.1;
IF [Product].[Product Name].CurrentMember.Name = "Product A"
THEN [Measures].[Total Sales] * 1.5
END IF;
END SCOPE;
```

A. Option A

B. Option B

C. Option C

D. Option D

Correct Answer: C

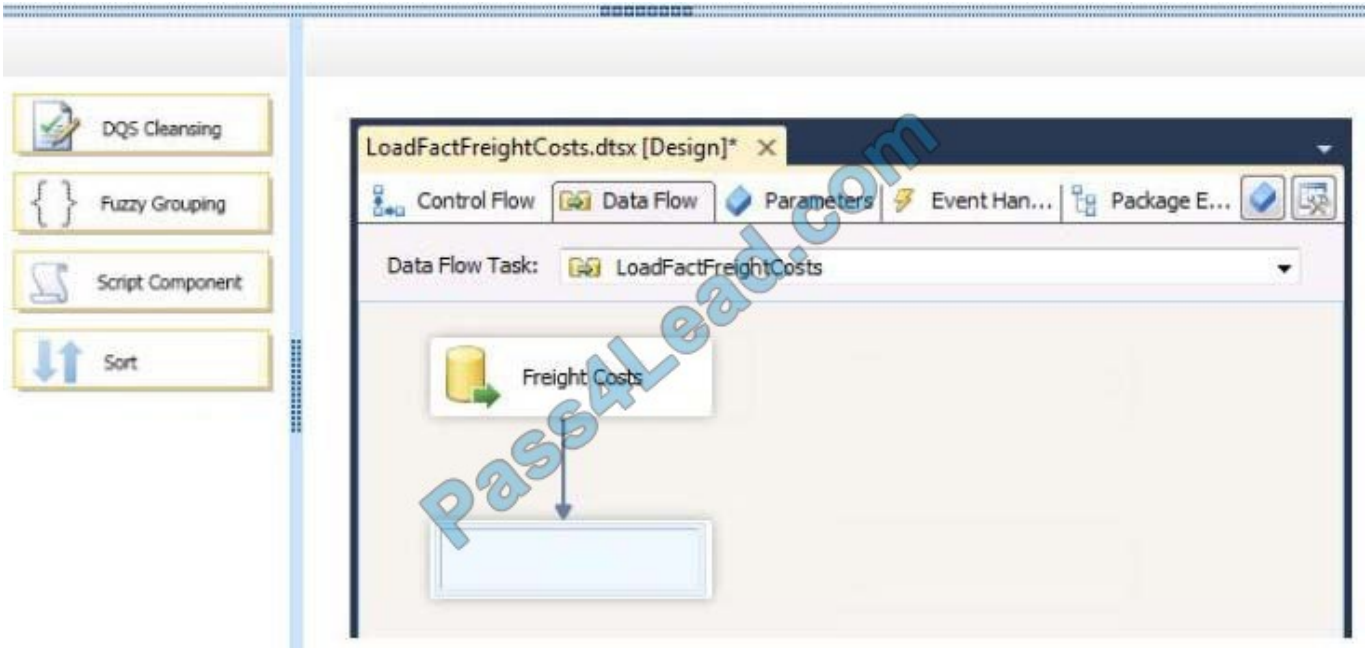

QUESTION 3

DRAG DROP

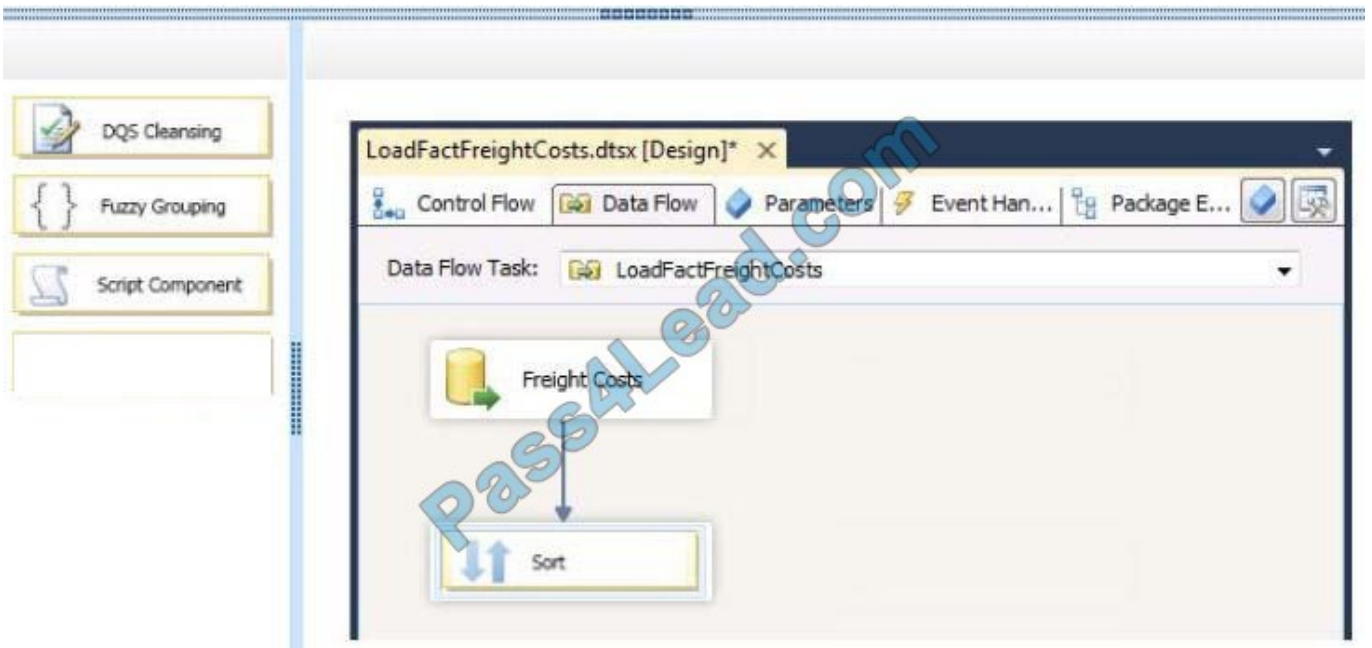

You need to configure the LoadFactFreightCosts package to address the data integrity issues.

Which data flow component should you use to answer, drag the appropriate data flow component to the answer area.

Select and Place:

Correct Answer:

QUESTION 4

HOTSPOT

You are configuring the partition storage settings for a SQL Server Analysis Services (SSAS) cube.

The partition storage must meet the following requirements:

Optimize the storage of source data and aggregations in the cube.

Use proactive caching.

Drop cached data that is more than 30 minutes old.

Update the cache when data changes, with a silence interval of 10 seconds.

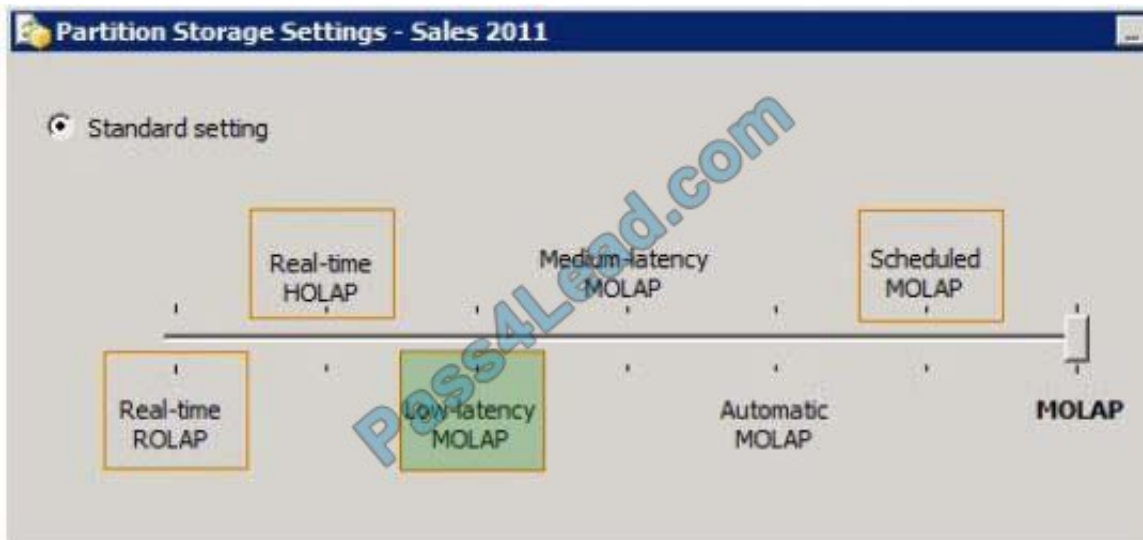

You need to select the partition storage setting.

Which setting should you select? To answer, select the appropriate setting in the answer area.

Hot Area:

Correct Answer:

<http://msdn.microsoft.com/en-us/library/ms175646.aspx>

Low Latency MOLAP Detail data and aggregations are stored in multidimensional format. The server listens for

notifications of changes to the data and switches to real-time ROLAP while MOLAP objects are reprocessed in a cache. A silence interval of at least 10 seconds is required before updating the cache. There is an override interval of 10 minutes if the silence interval is not attained. Processing occurs automatically as data changes with a target latency of 30 minutes after the first change.

This setting would typically be used for a data source with frequent updates when query performance is somewhat more important than always providing the most current data. This setting automatically processes MOLAP objects whenever required after the latency interval.

Performance is slower while the MOLAP objects are being reprocessed.

QUESTION 5

You are developing the database schema for a SQL Server Analysis Services (SSAS) BI Semantic Model (BISM). The BISM will be based on the schema displayed in the following graphic.

You have the following requirements:

Ensure that queries of the data model correctly display average student age by class.

Ensure that the solution supports role-based security and partitions.

Minimize development effort.

You need to design the data model.

What should you do(More than one answer choice may achieve the goal. Select the BEST answer.)

- A. Create a multidimensional project and define measures and a many-to-many dimensional relationship. Create partitions in SQL Server Management Studio (SSMS).
- B. Create a multidimensional project and define measures and a reference relationship. Create partitions in SQL Server Data Tools (SSDT).
- C. Create a tabular project and define measures. Create partitions in SQL Server Data Tools (SSDT).
- D. Create a tabular project and define calculated columns. Create partitions in SQL Server Management Studio (SSMS).

Correct Answer: A
