QUESTION 1

You are designing aggregations for a SQL Server Analysis Services (SSAS) cube.

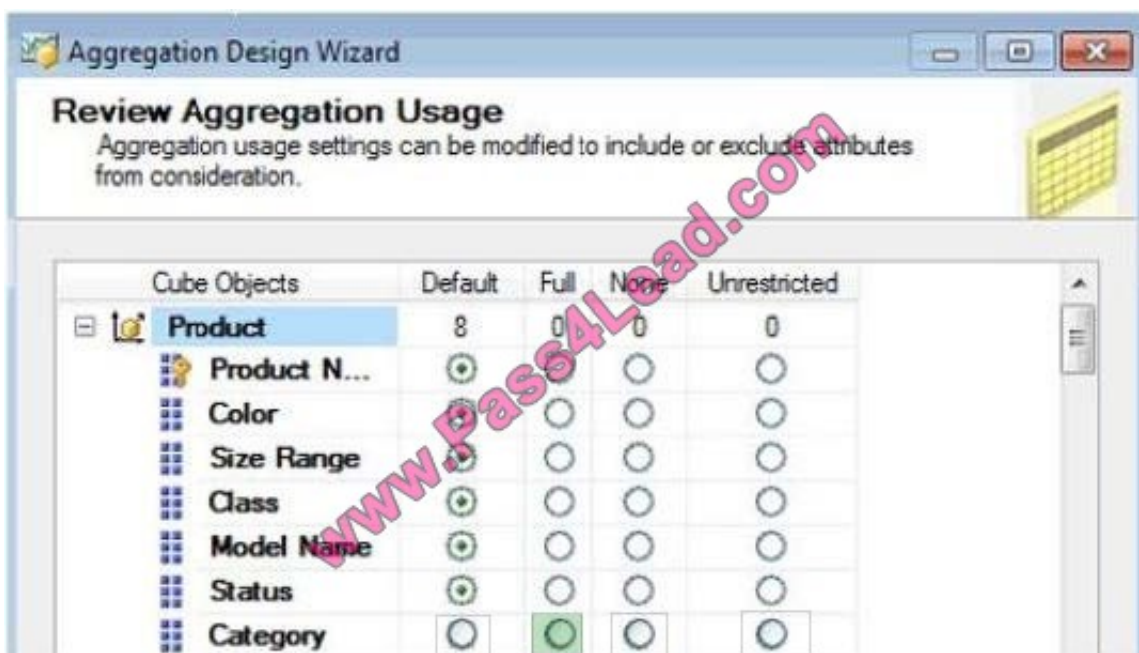

You need to ensure that every aggregation includes the Category attribute.

Which option should you select? To answer, select the appropriate option button in the answer area.

Hot Area:

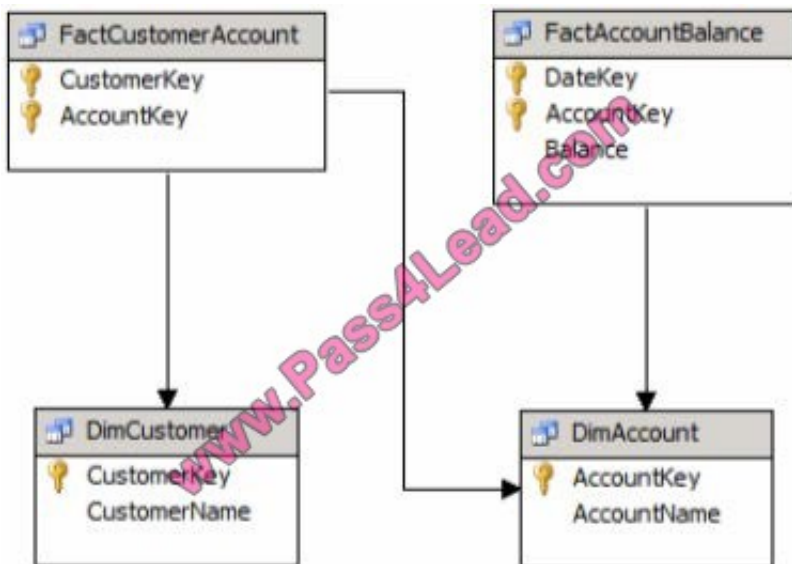

Correct Answer:

QUESTION 2

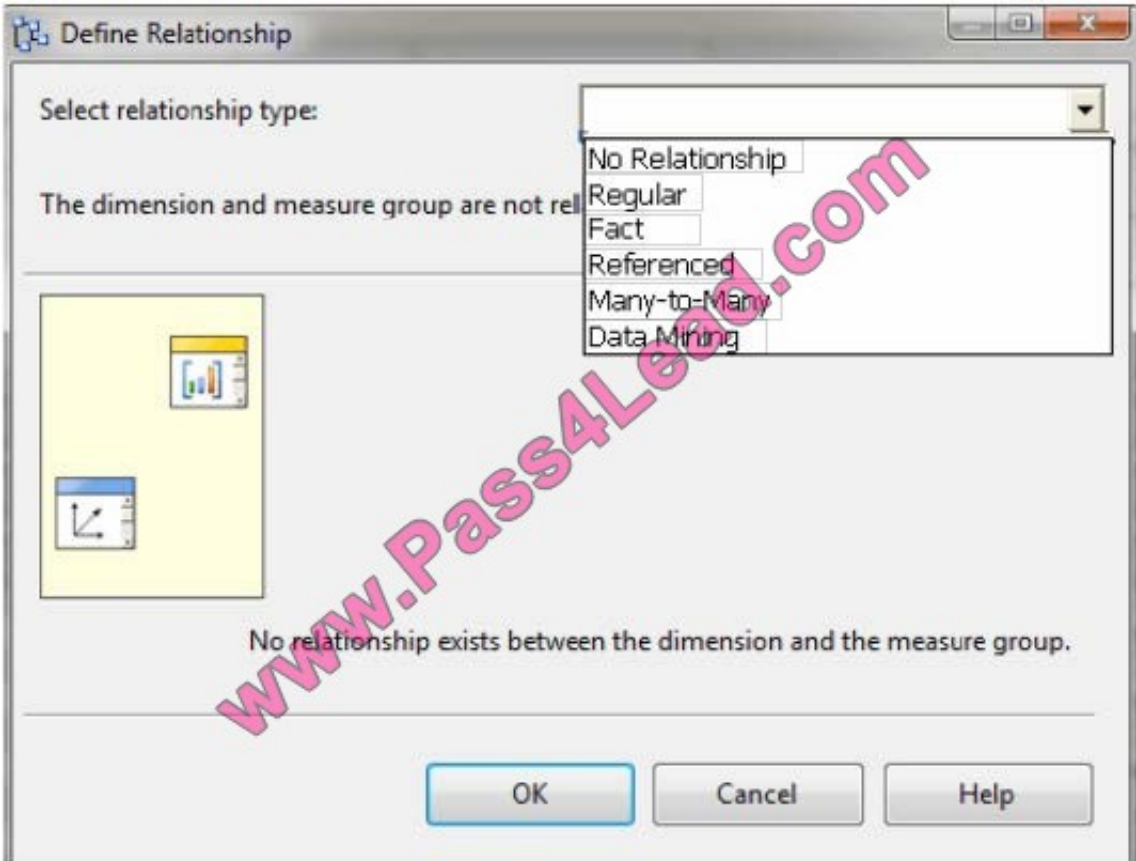

You are developing a SQL Server Analysis Services (SSAS) cube. A dimension named Customer is based on the DimCustomer table. A subset of the data source view is shown in the following graphic.

You need to relate the Customer dimension to the AccountBalance measure group.

Which relationship type should you choose? To answer, select the appropriate option from the drop-down list in the dialog box.

Hot Area:

Correct Answer:

**QUESTION 3**

You are designing a SQL Server Integration Services (SSIS) solution. The solution will contain an SSIS project that includes several SSIS packages. Each SSIS package will define the same connection managers and variables.

You have the following requirements:

Ensure that the deployment model supports changing the content of connection strings by using parameters at execution time.

Ensure that the deployment model automatically starts from calls to the catalog.start_execution stored procedure in the SSISDB database.

Maximize performance at execution time.

Minimize development effort.

You need to design a solution that meets the requirements.

What should you do? (More than one answer choice may achieve the goal. Select the BEST answer.)

- A. Use a project deployment model. Modify connection manager properties to use project parameters. Ensure that the SSISDB database is created.
- B. Use a project deployment model. Configure connections in an XML configuration file referenced by an environment variable that corresponds to the SQL Server environment of each SSIS package.
- C. Use a package deployment model. Use a SQL Server package configuration with a common filter. Change the contents of the SSIS Configurations table at runtime.
- D. Use a package deployment model. Save each SSIS package to a file share that can be accessed from all environments.

Correct Answer: A

QUESTION 4

You are developing a SQL Server Analysis Services (SSAS) cube.

You need to add a calculated member to the Customer dimension to evaluate the sum of values for the United Kingdom and the United States.

Which expression should you use? (To answer, drag the appropriate expression to the answer area.)

Select and Place:

```
[Customer].[Customer Geography].[Country].&[United Kingdom] & [Customer].[Customer Geography].[Country].& [United States]
```

```
{[Customer].[Customer Geography].[Country].&[United Kingdom],[Customer].[Customer Geography].[Country].& [United States]}
```

```
[Customer].[Customer Geography].[Country].&[United Kingdom] UNION [Customer].[Customer Geography].[Country].&[United States]
```

```
SUM({[Customer].[Customer Geography].[Country].&[United Kingdom],[Customer].[Customer Geography].[Country].& [United States]})
```

```
SUM({[Customer].[Customer Geography].[Country].&[United Kingdom],[Customer].[Customer Geography].[Country].& [United States]})
```

```
CREATE MEMBER
```

```
CURRENTCUBE.[Customer].[Customer Geography].[All].[UK and USA] AS
```

```
;
```

Correct Answer:

```
[Customer].[Customer Geography].[Country].&[United Kingdom] & [Customer].[Customer Geography].[Country].& [United States]
```

```
{[Customer].[Customer Geography].[Country].&[United Kingdom],[Customer].[Customer Geography].[Country].& [United States]}
```

```
[Customer].[Customer Geography].[Country].&[United Kingdom] UNION [Customer].[Customer Geography].[Country].&[United States]
```

```
SUM({[Customer].[Customer Geography].[Country].&[United Kingdom],[Customer].[Customer Geography].[Country].& [United States]})
```

CREATE MEMBER

```
CURRENTCUBE.[Customer].[Customer Geography].[All].[UK and USA] AS  
SUM({[Customer].[Customer Geography].[Country].&[United Kingdom],[Customer].[Customer Geography].[Country].& [United States]})
```

;

QUESTION 5

You plan to deploy a SQL Server Integration Services (SSIS) project by using the project deployment model.

You need to monitor control flow tasks to determine whether any of them are running longer than usual.

Which three actions should you perform in sequence? (To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.)

Select and Place:

Write a query against the **catalog.execution_component_phases** view. Add a calculation to the query to compare durations to the **catalog.executions** view.

Write a query against the **catalog.execution_data_statistics** view. Add a calculation to the query to compare durations to the **catalog.executions** view.

Write a query against the **catalog.execution_data_statistics** view. Add a calculation to the query to compare durations to the **catalog.execution_data_taps** view.

Write a query against the **catalog.execution_component_phases** view. Add a calculation to the query to compare durations to the **catalog.execution_data_taps** view.

Execute the query.

Connect to the **SSISDB** database.

Connect to the **msdb** database.

Correct Answer:

Write a query against the **catalog.execution_data_statistics** view. Add a calculation to the query to compare durations to the **catalog.executions** view.

Write a query against the **catalog.execution_data_statistics** view. Add a calculation to the query to compare durations to the **catalog.execution_data_taps** view.

Write a query against the **catalog.execution_component_phases** view. Add a calculation to the query to compare durations to the **catalog.execution_data_taps** view.

Connect to the **msdb** database.

Connect to the **SSISDB** database.

Write a query against the **catalog.execution_component_phases** view. Add a calculation to the query to compare durations to the **catalog.executions** view.

Execute the query.
