**QUESTION 1**

You are designing a Windows Presentation Foundation (WPF) application by using Microsoft .NET Framework 4 and Microsoft Visual Studio 2010.

You need to ensure that the following requirements are met:

All UI elements are labeled.

All property values are exposed.

Keyboard navigation contains tab stops for all controls.

The application functions on high contrast displays.

Which testing strategy should you recommend?

- A. Stress testing
- B. Stability testing
- C. Usability testing
- D. Accessibility testing

Correct Answer: D

QUESTION 2

You are designing a Windows Presentation Foundation (WPF) application.

The application will be localized into multiple languages.

You need to recommend an approach for preparing the application for localization. Which two actions should you recommend? (Each correct answer presents part of the solution.)

Choose two.)

- A. Add UID attributes to language-specific elements in the XAML file.
- B. Define a UICulture element for each language in the project file.
- C. Add an application setting for each language to the App.config file.
- D. Translate the contents of the appropriate XAML elements into each localization language.

Correct Answer: AB

QUESTION 3

You are designing a new feature for an existing Windows Forms application by using Microsoft .NET Framework 4.

The application contains multiple forms that are loaded into a parent Multiple Document Interface (MDI) form.

Your company policy does not allow the use of third-party controls.

You need to ensure that the new feature meets the following requirements:

It provides a three-dimensional scale model.

It allows users to change the colors of the model and communicates the color selections back to the application.

It allows the model to scale, based on the user's client computer display resolution.

It is a child form in the MDI application.

What should you do?

- A. Design the new feature in the existing Windows Forms application as a Windows form. Add the form as a child form to the MDI window.
- B. Design the new feature in a new application by using Windows Presentation Foundation (WPF). Invoke the new WPF application from the existing Windows Forms application.
- C. Design the new feature in a new Windows Presentation Foundation (WPF) application. Host the existing application inside the new WPF application by using the `WindowsFormsHost` class.
- D. Design the new feature by using a Windows Presentation Foundation (WPF) user control. Use the `ElementHost` class to host the WPF user control in the existing Windows Forms application.

Correct Answer: D

QUESTION 4

You are designing a Windows application by using Microsoft .NET Framework 4 and Microsoft Visual Studio 2010.

The application retrieves data from multiple heterogeneous data sources. The retrieved data is aggregated into a single record set

You need to ensure that the application takes advantage of new multi-core server processors.

Which technology should you use?

- A. LINQ
- B. PLINQ
- C. ADO.NET DataSet
- D. ADO.NET Typed DataSet

Correct Answer: B

QUESTION 5

You are designing an application by using Windows Presentation Foundation (WPF) and Microsoft NET Framework 4.

The application is designed to allow novice users to enter data into a form.

If a user enters invalid data into an input control, the control blinks between two colors.

You need to ensure that the blinking visual feature can be applied to other controls without writing any additional code.

What should you do?

- A. Create a timer.
- B. Create a shared style.
- C. Create a WPF behavior
- D. Use a merged resource dictionary.

Correct Answer: C
