**QUESTION 1**

You are evaluating an ASP.NET Web application that includes three methods:

Calculate () performs CPU-intensive calculations on the server. GetData() retrieves data from a server-side data store and returns an XML file. WriteData() receives an XML file and writes data from the file to a server-side data store.

You need to recommend an approach for maximizing server throughput.

What should you recommend?

- A. Asynchronous processing for the GetData() and WriteData() methods.
- B. Synchronous processing for the WriteData() and Calculate() methods.
- C. Synchronous processing for the GetData() and WriteData() methods.
- D. Asynchronous processing for the GetOata() and Calculate() methods.

Correct Answer: A

QUESTION 2

You need to design a solution that supports the end user display requirements for data and graphics.

Which two actions should you recommend? (Each correct answer presents part of the solution. Choose two.)

- A. Use a language-specific master page.
- B. Replicate each page once for each supported language.
- C. Create a local resource file for each page and for each language.
- D. Populate the database with data in each language, and retrieve the data in the user\'s language.

Correct Answer: CD

QUESTION 3

You are designing an ASP.NET Web application.

You need to ensure that users can display the content of the application in a language that they select.

Which two approaches should you recommend? (Each correct answer presents part of the solution. Choose two.)

- A. Use language-specific master pages.
- B. Use CurrentUICulture.

C. Use CurrentCulture.

D. Use language-specific resource files.

Correct Answer: BD

QUESTION 4

You need to design session state management for the rewritten Web application. Which approach should you recommend?

A. Use a persistent cookie to store the authentication ticket.

B. Use the same machine key element attributes and values across all three servers.

C. Use a third-party cookie to store the authentication ticket.

D. Use different machine key element attributes and values across all three servers.

Correct Answer: B

QUESTION 5

You are designing a data access strategy for an ASP.NET Web application.

You plan to expose an existing data source by using WCF Data Services.

You need to recommend an approach to ensure that CRUD operations are possible.

What should you recommend?

A. Implement the IQueryable and IUpdatable interfaces on data source entities.

B. Implement the IEnumerable and IEditableObject interfaces on data source entities.

C. Implement the ILookup and IUpdatable interfaces on data source entities.

D. Implement the IContainer and IEditableObject interfaces on data source entities.

Correct Answer: A
