QUESTION 1

You have a SharePoint 2010 application deployed in production. The application has a list with a single long-running workflow named Version A . You design a new version of the workflow named VersionB. You have the following

requirements:

.Existing instances of VersionA must continue to run until completed.

.VersionB must always be instantiated in the future.

.VersionA must no longer be instantiated.

You need to design the solution to meet the requirements.

Which approach should you recommend?

A. Disable the Start this workflow when a new item is created property in the Start Options of VersionA

B. Disable the Start this workflow when a new item is created property in the Start Options of VersionB

C. Set the No New Instances property in the Remove Workflows settings of VersionA

D. Set the Optionally limit the number of versions to retain property in the Versioning Settings of the list.

Correct Answer: C

QUESTION 2

Your company has an existing SharePoint 2010 public-facing Web site. The Web site runs on multiple load-balanced Web front-ends.Your company recently changed its name.You are asked to design a plan to update the Web site content to reflect the company name change. You need to accomplish this with a minimum amount of developer hours and minimum impact on users.

Which approach should you recommend?

A. Create a PowerShell script to iterate through the site content and make the updates as needed.

B. Create a custom delegate control with the new company name and copy it to the \14\Config directory of all Web front-end servers. Perform an IISReset on each Web front-end server.

C. Create a custom application page with the new company name and copy it to the _layouts directory of all Web front-end servers.

D. Add a property in the web.config file to store the company name. Then update the master pages and page layouts to return the name from that property.

Correct Answer: A

QUESTION 3

You are designing a SharePoint 2010 site that employees will use for project collaboration.

The design should include a project name, identification number, and the names of the people on the project team displayed on a new page.You need to design the site to meet the following requirements:

.This page must be immediately available in existing sites in the site collection upon deployment.

.New sites must have this page immediately available.

Which approach should you recommend?

A. Create a master page and deploy it to the Master Page Gallery. Apply the master page to every site in the site collection.

B. Create a page layout and deploy it to the Master Page Gallery. Create a publishing page, based on the page layout, in every site in the site collection.

C. Create an application page and deploy it to the _layouts directory.

D. Create a Web Part page and deploy it to the top-level site of the site collection.

Correct Answer: C

QUESTION 4

You are developing an Internet Web site. You plan to use SharePoint 2010 for content management. The Web site design includes extensive graphics.You need to ensure that the following project requirements for the site are met:

.Complex structural changes to support the new branding .Consistency across all of its pages and subsites .Support for multiple browsers

Which approach should you recommend?

A. Develop a new custom master page to be applied throughout the site.

B. Develop a new custom template to be used throughout the site.

C. Use PowerPoint 2010 themes to apply new custom SharePoint branding throughout the site.

D. Specify an alternate cascading style sheet (CSS) file to use for all pages within the site.

Correct Answer: A

QUESTION 5

The development team you manage has added new functionality to an application in the development environment that improves the application currently running in the production SharePoint 2010 farm. The added functionality includes several custom Web Parts. You need to create a plan to add the new functionality to the existing production SharePoint 2010farm.

Which approach should you recommend?

A. Create a new application that includes the Web Parts and deploy it to the farm as a .wsp package.

B. Export the site hosting the Web Parts as a .stp template file. Change the template file and import the .stp file back into the production farm.

C. Build the new functionality into a feature and use the Stsadm Upgrade command to update the application in the farm.

D. Build the new functionality into a feature in a new solution package and deploy it to the production farm.

Correct Answer: D
