QUESTION 1

You plan to deploy three SharePoint Server 2010 Service Pack 1 (SP1) server farms named Farm1, Farm2, and Farm3. You identify the following requirements for each farm:

Farm1 will be dedicated to hosting shared services for users located in Asia and Africa.

Farm2 will host content and sites for users located in Asia. Farm3 will host content and sites for users located in Africa.

You plan to deploy the following service applications for all of the users:

Access Services

Managed Metadata Service

Business Data Connectivity Service

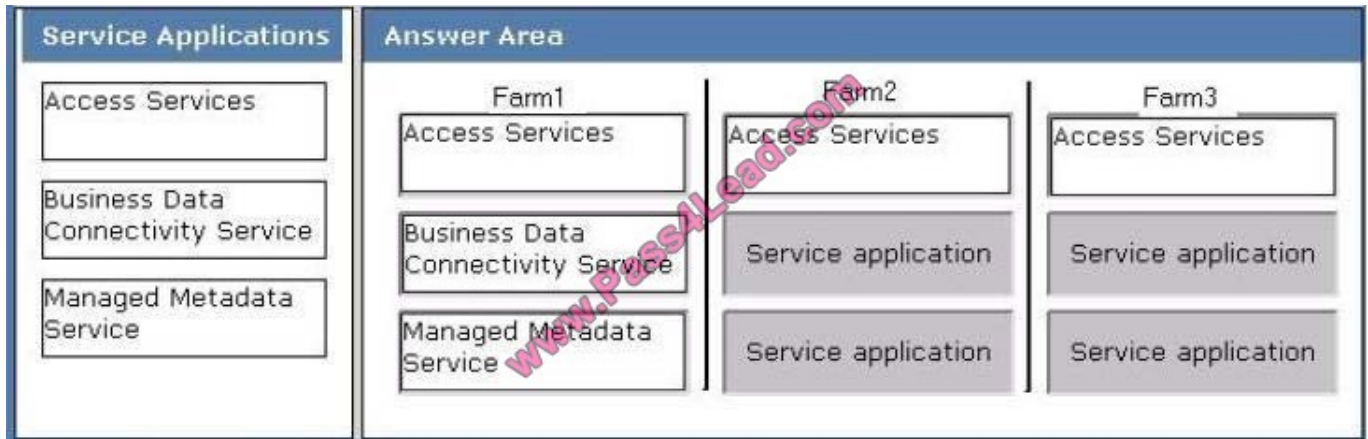

You need to recommend to which farm each service application must be deployed. The solution must minimize the number of service applications deployed to each farm. Any services that can be shared must be deployed to Farm1.

Which service applications should you recommend? To answer, drag the appropriate service application to the correct farm or farms in the answer area.

Select and Place:

Service Applications	Answer Area		
	Farm1	Farm2	Farm3
Access Services	Service application	Service application	Service application
Business Data Connectivity Service	Service application	Service application	Service application
Managed Metadata Service	Service application	Service application	Service application

Correct Answer:

QUESTION 2

You host a SharePoint Server 2010 Service Pack 1 (SP1) server farm for multiple tenants. The Enterprise license is activated for the farm.

You plan to deploy a web application that will contain two site collections named Collection1 and Collection2.

You need to ensure that all of the Enterprise features can be enabled in Collection1. The solution must ensure that only the features of Microsoft SharePoint Foundation can be enabled in Collection2.

What should you do?

- A. Implement document sets.
- B. Manage the web application features.
- C. Manage the site collection features.
- D. Implement feature packs.

Correct Answer: D

QUESTION 3

You are a SharePoint administrator for Contoso, Ltd.

The company has 2,000 employees and 500 external users who work at the offices of various partner companies.

You plan to deploy SharePoint Server 2010 to host an intranet Web site, an extranet Web site, and a public Web site for the company.

During capacity testing, you discover that InfoPath user sessions are forcibly terminated, resulting in the loss of form data.

You need to recommend a solution to support the required number of connections for InfoPath Forms Services.

What should you recommend?

- A. Distribute InfoPath forms in multiple form libraries.
- B. Configure page output caching.
- C. Create a new Secure Store Service application.
- D. Add a State Service database.

Correct Answer: D

QUESTION 4

You have a SharePoint Server 2010 Service Pack 1 (SP1) server farm. The farm contains 10 front-end Web servers that have the query server role installed.

You plan to index 15 million items.

You need to recommend a solution to decrease the relevance of search results that are indexed from a specific site.

What should you include in the recommendation?

- A. crawler impact rules
- B. authoritative pages
- C. server name mappings
- D. crawl rules

Correct Answer: B

QUESTION 5

You have a SharePoint Server 2010 Service Pack 1 (SP1) server farm. The farm contains two servers. The servers are configured as shown in the following table.

Server name	Server configuration
Server1	Front-end Web server
Server2	Microsoft SQL Server

You install Windows Server 2008 R2 on a new server named Server3. You need to add Server3 to the farm and enable the following service applications in the farm:- Visio Graphics Service- Word Automation Services

What should you do? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Actions	Answer Area
Install Microsoft Office 2010.	
Create a new content database.	
Run the Farm Configuration Wizard.	
Configure alternate access mappings.	
Run the SharePoint Products Configuration Wizard.	
Install SharePoint Server 2010 SP1 on a new server.	

Correct Answer:

Actions	Answer Area
Install Microsoft Office 2010.	Install SharePoint Server 2010 SP1 on a new server.
Create a new content database.	Run the SharePoint Products Configuration Wizard.
	Run the Farm Configuration Wizard.
Configure alternate access mappings.
