QUESTION 1

Your customer\\'s network consists of one Active Directory forest. The network contains a Microsoft System Center Configuration Manager (CfgMgr) server and a Microsoft System Center Operations Manager (OpsMgr) server.

All computers are joined to the Active Directory domain and have both CfgMgr and OpsMgr clients installed.

You plan to manage the software and hardware retirement process for the customer.

You need to identify all retired desktop computers.

What should you do?

A. Generate a CfgMgr report.

B. Generate an OpsMgr report.

C. Review the Active Directory Group Policy objects (GPOs).

D. Review the Active Directory domain controller event viewer logs.

Correct Answer: A

QUESTION 2

You manage a software asset lifecycle for a customer. The customer has centralized purchasing. You discover that some employees purchase software by using their personal credit cards.

You need to control employee software purchases.

What should you do?

A. Monitor employee expense reports on a monthly basis.

B. Identify approved software vendors in the product catalog.

C. Identify reclaimed licenses from decommissioned hardware.

D. Monitor license recovery information based on software usage.

Correct Answer: A

QUESTION 3

You have the following information about a customer\\'s environment:

?he network contains 180 computers.

Correct Answer: A

QUESTION 4

Your network contains 1,000 thin clients.

An automated inventory system manages all software accessed from the thin clients. You need to ensure that Microsoft Office inventory information is up-to-date.

What should you do?

A. Install a hardware inventory system and use Microsoft Product License Advisor (MPLA).

B. Install a Terminal Services Licensing server and use Microsoft Product License Advisor (MPLA).

C. Configure the inventory system to automatically delete unused instance records every 90 days.

D. Configure the inventory system to automatically delete instance records when users log off the thin clients.

Correct Answer: C

QUESTION 5

You are validating inventory accuracy for a customer. You gather the following data about the installation of Microsoft Office:

?ll licenses are for Office Professional Edition.

?any computers report multiple installations of Office. ?he customer purchased all Office licenses through volume licensing.

You plan to generate an inventory detail report.

You need to include the appropriate number of Office installations in the report.

Which number should you include?

A. All reported installations of Office.

B. One installation of Office per computer.

C. The number of authorized installations of Office.

D. The number of installations of Office currently in use.

Correct Answer: B
