QUESTION 1

You are using Windows Deployment Services (WDS) to deploy new images of Windows 7 to 64-bit computers.

Technicians receive the error message shown in the exhibit when they attempt to boot by using PXE.

You need to ensure that the technicians can boot the client computers by using PXE.

What should you do? (Choose all that apply.)

```
Windows Boot Manager (Server IP: 192.168.004.010)

Windows failed to start. A recent hardware or software change might be the
cause. To fix the problem:

1. Insert your Windows installation disc and restart your computer.
2. Choose your language settings, and then click "Next."
3. Click "Repair your computer."

If you do not have this disc, contact your system administrator or computer
manufacturer for assistance.

File: \Boot\BCD
Status: 0xc0000098

Info: The Windows Boot Configuration Data file does not contain a valid
OS entry.

ENTER=Continue ESC=Exit
```

- A. Run the `bcdedit /set {ntldr} description "Windows 7 32-bit"` command.
- B. Add a 64-bit boot image to the WDS server.
- C. Add a 64-bit install image to the WDS server.
- D. Add a 32-bit boot image to the WDS server.
- E. Run the `bcdedit /set {ntldr} description "Windows 7 64-bit"` command.
- F. Add a 32-bit install image to the WDS server.

Correct Answer: BD

QUESTION 2

Your company has client computers that run Windows XP Professional.

You are planning to install Windows 7 Enterprise on the existing client computers.

You have the following requirements:

You need to design a user state migration strategy that supports the requirements.

What should you do?

- A. Use a hard-link migration store.
- B. Perform an offline migration by using Windows.old.
- C. Use a compressed migration store.
- D. Perform an offline migration by using Windows PE.

Correct Answer: C

Compressed migration

The compressed migration store is a single image file that contains all files being migrated and a catalog file.

This image file is often encrypted and protected with a password, and cannot be navigated with Windows Explorer.

QUESTION 3

You need to prevent users from accessing USB flash drives on portable computers. What should you do? (Choose all that apply.)

- A. Create a security group in AD DS and place all user objects for users with portable computers in the group.
- B. Create a security group in AD DS and place all portable computer objects in the group.
- C. Create a GPO that blocks the use of specific GUIDs used by USB flash drives and link it to the root of the domain.
- D. Create a WMI filter that applies only to Model A and B computers and link it to a GPO.
- E. Create an AppLocker policy that applies to the AD DS computer group you created.
- F. Create an AppLocker policy that applies to the AD DS user group you created.

Correct Answer: CD

QUESTION 4

Your company has offices in several countries. You must test and validate all operating system images before you deploy them.

You create a Windows 7 Enterprise master image that has all language packs installed.

You test and validate the master image.

You are planning to create regional images based on the master image. Each regional image will contain only the language pack that is necessary for a specific geographic region.

You have the following requirements:

You need to create the regional images.

What should you do?

- A. Run lpksetup.exe /u in unattended mode on the master image.
- B. Deploy the master image to a target computer. Remove the unnecessary language packs, and then capture each regional image.
- C. Service the master image online by using the Deployment Image Servicing and Management (DISM) tool.
- D. Service the master image offline by using the Deployment Image Servicing and Management (DISM) tool.

Correct Answer: D

Deployment Image Servicing and Management (DISM) tool:

Image servicing and management solutions fall into two main categories:

Managing the data or information included in the Windows image, such as enumerating or taking an inventory of the components, updates, drivers, or applications contained in an image.

Servicing the image itself, including adding or removing driver packages and drivers, modifying language settings, enabling or disabling Windows features, and upgrading to a higher edition of Windows.

QUESTION 5

You create a Windows 7 deployment image that includes custom Internet Explorer branding and search providers.

Your company decides to deploy all custom settings by using Group Policy.

You need to restore the Internet Explorer settings in the deployment image to the Microsoft default settings.

Which two actions should you perform? (Each correct answer presents part of the solution.

Choose two.)

- A. Use the Reset Internet Explorer Settings (RIES) feature, and run the Remove Branding process on the deployment image.
- B. Update the Internet Explorer Maintenance policy processing Group Policy object (GPO) settings for all computers.
- C. Update the Internet Explorer Manage Add-ons settings for all computers.
- D. Use the Reset Internet Explorer Settings (RIES) feature, and run the Reset process on the deployment image.

Correct Answer: AD
